

Works with H style Head Units and the iPad 10.2" 7th Generation.

The Lilitab Barcode Accessory simplifies barcode scanning using the iPad 7th Generation's rear camera. It's built in mirror folds the rear camera path to point downwards, enabling the scanning of QR and barcodes that are waved underneath the kiosk.

Easy to integrate

You can use the Lilitab Kiosk Management System (KMS) to present your web-site and enable barcode scanning without a native app or any iOS programming. Alternatively you can use Apple's iOS barcode reading functionality within your own iOS app.

Lots of applications

Grab-n-Go. For self-checkout kiosks, the barcode scanner can easily capture your product barcodes or QR codes for quick product entry.

Visitor registration. Save your guests time and frustration by emailing or texting them a QR code that be can used at check-in.

Special offers and promotions. Send QR codes to your customers for special discounts or promotional pricing.

Price look-up (PLU). Allow your customers to scan product barcodes that trigger your software to pull up pricing, videos and other product details.
