# ASSEMBLY INSTRUCTIONS

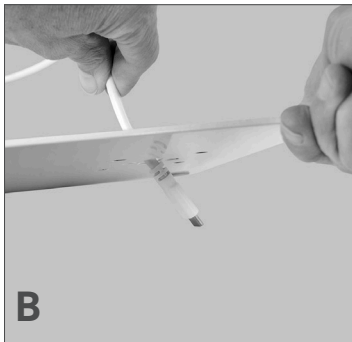

**1. Cable routing.** Choose your method of how you thread your charge cable that came with your kiosk:

**A:** Exit out the back of the foot cover (either with base, or securely mounted to substrate—see page 5).

**3. Foot Cover.** Slide the foot cover down the pole to cover the screws. Velcro will hold it in place once positioned.

**B:** Exit through the compact base or substrate (no wire showing). This will require cable routing through your substrate—see page 5.

**4. Thread the charge cable** through the opening in the back of the Head Unit (packaged separately).

**2. Attach Compact Base.** Line up the bottom of the mount pole with the four (4) screw holes in the compact base. Attach using the **four (4) Compact Base Screws.**

**NOTE:** You will need to hold the foot cover up and out of your way while bolting. If not using the compact base, attach to surface using template on page 5, and thread the cable through your substrate.

**5. Attach the Head Unit** using the **four (4) M3x7mm Head Mount Security Screws** and **Silver L Key.**

**NOTE:** Rotating the neck security cover 90° will make access to the screw openings easier to access.

# ASSEMBLY INSTRUCTIONS

- 6. Neck Security Cover.** After you attach the Head Unit, slide the security cover up and secure in place using the **two (2) M3x10mm security cover screws** and **silver L key**.

**NOTE:** The security cover screws should be oriented such that they are parallel to the long edge of the Head Unit, as shown. If they're not, simply rotate the security cover.

## KENSINGTON LOCK

You can use a Kensington Desk Mount Anchor and the Loradar Anchor Plate with a Kensington Lockhead to secure your kiosk on a counter/surface.

## BOLT DOWN INSTALLATION

The Lilitab Counter Basic Fixed can be permanently mounted to any hard surface.

Power supply cable can run under or on top of surface. In this example, the cables exit through the substrate.

### BOLT DOWN INSTRUCTIONS

Use two (2) bolts, wood screws or other fastener suitable for your surface's substrate (m6, no.14 or 1/4" diameter). Use the mounting pattern to the right for proper alignment.

Mounting pattern 1:1 scale
