Pro advantages

MagDOCK. Our patented MagDOCK feature is located at the top of the post where the head unit connects to the mount. With a turn of a key, the head unit detaches for assisted selling, maintenance or access to the tablet.

Experience zero downtime. With MagDOCK, if your tablet suddenly stops working, simply swap it out for a new one, on the fly. No need to call a technician.

Always charged. You never have to remove your tablet to recharge it. It's charged via a pass-through port in the head unit and charges automatically when docked.

Core features

Tablet friendly. Lilitab kiosks support most 10" iPad and Samsung tablets, the iPad Pro 12.9", and more.

Smart design. The Tabletop Mount houses your tablet's power adapter to ensure a safe connection that's out of site.

Radio transparent. The metal free head unit doesn't interfere with WiFi, 4G, or Bluetooth signals, ensuring maximum range and data throughput.

Anti-theft. Our patented perimeter latching system ensures your tablet is secure. For permanent installation, you can bolt the mount or base directly to a surface.

ADA compliant. When mounted correctly the Lilitab Tabletop Mount is fully compliant with the Americans with Disabilities Act (ADA). There's also an option for an audio jack when headphone-supplied audio is required.

Easy to clean. Lilitab kiosks have been designed with infection control in mind. For food service and healthcare environments we offer a wipe-clean faceplate with integral film that isolates the touchscreen from dirt and pathogens.

Adaptable

Upgradeable. No matter what new tablets are introduced into the market, Lilitab is ready and equipped for change and upgrade.

Mega expandable. With added expansion ports on the back of the head unit, you can easily add third party electronics, as well as various customizations such as exposing the rear facing camera on most tablets.

Accepts payment. Lilitab has various payment module options, including the Magtek eDynamo with chip and mag-stripe and the liliswipe encrypting mag-stripe reader.

Faceplate options. Choose from various options for exposing and hiding the front facing camera and home button.
