HEAD UNIT

MOUNT ARM

BUMPER PLATE

ASSEMBLY INSTRUCTIONS

1. Use bumper plate to mark screw locations on wall.

NOTE: If you are routing the USB cable through your wall substrate, trace the oval opening in the center of the bumper plate to mark the area that you will need to cutout to pass the USB cable through.

2. Attach lilitab Wall mount arm to wall using 4 x flathead screws appropriate for your wall substrate (not included).

NOTE: Ensure the bumper plate is positioned between the mount arm and wall in the desired orientation to prevent the unit from hitting the wall when positioned.

3. Open the head unit by placing it facedown on a clean surface and squeezing the finger latches together as shown. Carefully lift up and the faceplate will come off, allowing access to the inside of the head unit.

4. Install the charge and sync cable that came with your tablet into the head unit by threading it through the metal plate located in the center of the head unit.

5. Place the head unit onto a clean surface with the inside of the enclosure facing up (the lilitab logo on the rear of the unit will face down and away from you). Slide all four of the green retaining clips towards the outside of the enclosure.

NOTE: The green keepers will not be present for the iPad Air, Google Nexus, Samsung Galaxy Tab 3 or Samsung Note. The faceplate's locating tabs will hold the tablet in place.

6. Plug the cable that came with your tablet's into its charge port and place it inside the enclosure face up (screen faces towards you).

ASSEMBLY INSTRUCTIONS

- 7. Slide all four green retaining clips** towards the center of the tablet ensuring they securely hold the tablet in place.

NOTE: You may need to adjust the position of the tablet slightly to allow all four clips to slide home properly.

- 8. Position the faceplate** over the tablet such that its openings are oriented as you wish (faceplates have different combinations of home button and camera openings). Gently press down around the edge of the faceplate and it will snap into place.

NOTE: If the faceplate does not snap into place evenly (or if one or more corners is lifting up) ensure that all four of the green retaining clips are seated fully home.

- 9. Thread the charge and sync cable** that came with your tablet through the top of your lilitab mount.

- 10. Attach your lilitab head unit** to the top of your mount via the 4 security screws provided (a security L key is provided with your mount for this purpose).

USING YOUR MAGKEY

1. You can use the included MagKey with an iPad 2,3 or 4 in your lilitab. The MagKey allows you to sleep the iPad without having any access to it. This ensures you (and your staff!) can turn your kiosk on and off at the end of the day without removing the iPad from the kiosk. You will always know when the iPad is sleeping because once inserted the Magkey pokes out the top of unit like a little flag.

2. To sleep your iPad simply insert your MagKey with the orange side facing front and the black side facing back.

3. Remove your Magkey and your lilitab will wake up, in exactly the same state it was in before it went to bed ;-)

NOTE: The MagKey will work on any iPad® 2 or newer. It requires that the iPad Cover Lock/Unlock preference is turned on. You can find this in Settings→ General→ iPad Cover Lock/Unlock.

Replacement MagKeys can be ordered directly from the website: www.lilitab.com

Cleaning and caring for your lilitab.

To keep your lilitab looking and working great we recommend using a lint-free cloth to gently wipe it down.

To remove and prevent fingerprints we recommend Brillianize.

DO NOT use window cleaner, ammonia-based cleaners or any type of scouring or abrasive cleaner.
