

# The lilitab tablet kiosk system will change the way you think about tablet kiosks.

Say goodbye to those dusty, barely used kiosks left in the corner and say hello to our sleek, multi-function tablet kiosk system that will move your business forward with its many innovative features. The lilitab kiosk offers maximum interaction and versatility for all levels of business. They're sure to make a statement no matter how you use them.

## Lots of options

**Tablet Friendly.** Lilitab is able to support most 10" tablets on the market, including all Apple, Microsoft Surface, Samsung and more. And no matter what new tablets are introduced into the market, lilitab is ready and equipped for change and upgrade.

**Maximum versatility.** The Lilitab Kiosk System offers three tablet attachment options including Smart, Pro and Basic. Aside from Basic, which has a fixed neck and no tilt, both Smart and Pro provide easy tablet undocking and tilting abilities +/- 22.5°. For more detail, see below.

## SMART DOCK

With lilitab SmartDOCK, staff can undock the tablet by entering their PIN on-screen or flashing a QR-coded badge at the tablet's camera. When finished, simply replace the tablet onto the dock, where it automatically locks in place and begins charging and closes out the audit trail.

## lilitab KMS

Lilitab KMS connects tablets to a cloud-based server for secure monitoring, reporting, and sharing between staff. It works alongside your MDM to provide rich business insights into how your tablets are being used, in realtime. All tablets can be monitored & administered from any browser. Lilitab KMS works particularly well in combination with our SmartDOCK product, enabling system monitoring all the way to the power outlet.

## MAG DOCK

With a turn of the MagKEY, the lilitab MagDock easily detaches the head unit for assisted selling, maintenance or access to the tablet. The pass through power automatically charges the tablet when docked.

## Customize your lilitab

**Face options.** Choose from our many faceplate configurations that expose the home button and front facing camera in any combination.

**Optional secure card reader.** Choose from our own **liliSwipe**, an iPad 30 lightning pin encrypting and tokenizing reader or an EMV/ Dip reader

**Mega expandable.** Expansion ports allow you to easily add custom integrations of third party electronics such as Rfid readers etc.

**Brand it your way.** It's easy to brand your lilitab and clearly communicate your message with our branding accessories. They include silk-screen faceplates, backdrop graphics and banner mounts.

**Dress it up.** Take your lilitab to another level with add-on accessories that include a keyboard mount, merchandising rack, brochure pocket and ID Scanner.

## It's all in the details

**Radio transparent.** With no metal in the lilitab Head Unit, it won't interfere with your tablet's various signals (WiFi, 4G, and Bluetooth), ensuring that you get maximum range and data throughput.

**Multiple mounting options.** The Lilitab Kiosk System consists of various mount options, including bolt-down floor or free-standing floor with optional base plate, counter, surface, picture and wall.

**Tamperproof.** All cables are concealed inside the lilitab head unit and mount, leaving nothing visible for tampering.

**Tablet safe.** Silicone pads inside the lilitab Head Unit cradle your tablet against bumps and knocks. This ensures your tablet is safe from damage if dropped.

**Rock solid and anti-theft.** The lilitab Head Unit is manufactured from ABS, one of the strongest plastics available. This together with our patented perimeter latching system ensures your tablet is safe inside. The mount is manufactured from powder-coated steel that is nearly impervious to chips and scratches. At the rear of its base, the lilitab Floor has a solid steel lock-point, so you can secure it with a Kensington lock. For a more permanent installation on all models, the pole mount can be bolted to a surface through mount points inside the tubular base, leaving nothing visible or accessible.

## Questions?

We want to help. Send us an email to [info@lilitab.com](mailto:info@lilitab.com) or call 888.705.0190. You may also visit us online at [www.lilitab.com](http://www.lilitab.com) for more detailed tablet kiosk information and pricing.
