

BAMBOO

- This fiber is made from the bamboo plant and is known for its incredibly soft hand, antibacterial qualities, and wicking abilities.
- The process of growing bamboo makes the fiber a good choice for the environment, although the chemicals and energy used to melt down and convert the fiber into usable fabric, offset some of its eco-friendly properties.

PROPERTIES:

- Breathable.
- Absorbs perspiration quickly without feeling damp to the skin.
- Wrinkles easily.
- Does not build up static.
- Draws water away from the body.
- Antibacterial.
- Offers UV protection.

CARE:

- Typically machine washable - check the care label if unsure.
- Wash on gentle cycle with cold water + a mild detergent.
Hang or lay flat to dry.
- Press on medium-high heat on the inside of the garment - use a pressing cloth if possible.
