

LYOCELL

- Also known as **tencel** - the most sustainable and eco-friendly out of all the regenerated fibers.
- It is form of rayon made specifically from eucalyptus trees and the process of breaking it down involves recyclable, organic solvents.
- It is more absorbent than regular rayon, yet it shrinks less and wrinkles less.

PROPERTIES:

- Breathable.
- Absorbs perspiration quickly without feeling damp to the skin.
- Wrinkles less than other regenerated fibers.
- Does not build up static.
- Draws water away from the body.
- Poor elasticity.

CARE:

- Typically machine washable - check the care label if unsure.
- Wash on gentle cycle with cold water + a mild detergent.
Hang or lay flat to dry.
- Press on medium-high heat on the inside of the garment - use a pressing cloth if possible.
