

# MODAL

- A type of rayon that comes specifically from beech trees and is often created as a microfiber.
- The fiber is gaining popularity due to its absorbent properties (50% more than cotton) and is often found in garments blended with other fibers due to its desirable wearability characteristics.
- It boasts a silky hand and excellent drape.

## PROPERTIES:

- Breathable.
- Absorbs perspiration quickly without feeling damp to the skin.
- Wrinkles easily.
- Draws water away from the body.
- Antibacterial.
- Offers UV protection.

## CARE:

- Typically machine washable - check the care label if unsure.
- Wash on gentle cycle with cold water + a mild detergent.  
Hang or lay flat to dry.
- Press on medium-high heat on the inside of the garment - use a pressing cloth if possible.
