Kestrel® 1000
Pocket Wind™ Meter

Current, Maximum and Average Wind Speed

OPERATION

1) Slide off Cover.  
2) Turn On: Press [ON] to turn on unit.

3) Select Operating Mode: Press and release [MODE] to change the operating mode. You can select a different operating mode at any time.

- Current Wind Speed
- Maximum 3-Second Gust Since Power On
- Average Wind Speed Since Power On

4) Select Measurement Scale: Hold down [ON] while pressing [MODE] to change the measurement scale. You can select a different scale at any time.

- KT (Knots)
- M/S (Meters per Second)
- KM/H (Kilometers per Hour)
- MPH (Miles per Hour)
- FPM (Feet per Minute)
- °F (Beaufort Force)

5) Take a Measurement: Simply point the unit into the air flow you wish to measure.

The Kestrel turns itself off automatically after 30 minutes of no button presses.

SPECIFICATIONS

Wind Speed Functions
Modes: Moving 3-second average, maximum 3-second gust since power on (MAX) and average since power on (AVG).

Units: Knots (KT), meters per second (M/S), kilometers per hour (KM/H), miles per hour (MPH), feet per minute (FPM) and Beaufort force (°F).

On-Axis Accuracy: greater of ± 3% of reading or ± least significant digit.

Off-Axis Response: -1% @ 5°, -2% @ 10°, -3% @ 15°.

Accuracy Degradation: (loss of accuracy due to impeller bearing wear) < 2% after 100 hours use at 7 M/S [14 KT, 25 KM/H, 16 MPH, 1400 FPM].

Minimum Speed: 0.3 M/S [0.6 KT, 1.0 KM/H, 0.7 MPH, 59.0 FPM].

Maximum Speed: 40 M/S [78 KT, 144 KM/H, 89 MPH]; 1,990 FPM (display limit).

Display
Type: Reflective 2 ½ digit LCD.
Digit Height: 10 mm (0.4 in.).
Update: 1 second.

Range and Resolution: Depends on measurement scale selected – see chart:

<table>
<thead>
<tr>
<th>Scale</th>
<th>Range</th>
<th>Resolution</th>
</tr>
</thead>
<tbody>
<tr>
<td>KT, M/S, KM/H</td>
<td>0.0-19.9</td>
<td>0.1</td>
</tr>
<tr>
<td>MPH, °C &amp; °F</td>
<td>20-199</td>
<td>1</td>
</tr>
<tr>
<td>FPM</td>
<td>0-1,990</td>
<td>10</td>
</tr>
</tbody>
</table>

Display Temperature Limitations: Normal operation from -15°C to 60°C [-4°F to 140°F]. Below -15°C [-4°F], accurate readings may be taken by keeping the unit warmer than -15°C [4°F] and exposing it for the minimum time necessary to take a reading (less than one minute).

Automatic Shutdown: After 30 minutes of no button presses.

Environmental
Sealing: Electronics enclosure IP67 – water resistant to 1 m. [3 ft.]. Floats.
Shock: Drop tested to 2 m. [6 ft.].
Storage Temperature: Prolonged exposure to temperatures below -20°C [-4°F] may cause permanent damage.

Physical
Buttons: Two sealed tactile rubber buttons control all functions.
Case: Slip-on case prevents damage to display and moving parts.
Dimensions: 122 x 42 x 14 mm. [4.8 x 1.7 x 0.6 in.]; case, 117 x 46 x 19 mm. [4.6 x 1.8 x 0.7 in.]; lanyard, 0.5 m. [10 in.].
Weight: Unit, 43 g. [1.5 oz.]; slip-on case, 23 g. [0.8 oz.].
**MAINTENANCE & TROUBLESHOOTING**

**Storing Your Kestrel**  
Avoid storing your Kestrel where it will be exposed to temperatures below -20°C [-4°F] or above 80°C [176°F] for extended periods of time. Doing so may permanently damage the LCD, electronics, battery or enclosure. (Note that the inside of a car parked in the hot sun can reach very high temperatures.) If the temperature of the actual LCD of your unit exceeds 70°C [158°F], it will temporarily become solid black until it cools down to below this temperature.

**Use of the Lanyard and Cover**  
Your Kestrel is shipped with the slip-on cover captivated by the lanyard to prevent loss. If you prefer to be able to remove the cover entirely, open the lanyard end cap with a small screwdriver, then remove the slip-lock. Slide the cover completely off the lanyard, then reassemble the slip-lock and lanyard end cap as before.

**Replacing the Battery**  
When your display grows dim or blank, replace the battery. Use a large coin to open the battery compartment. Insert a new CR2032 coin cell (available where watch batteries are sold), positive (+) pole up.

When replacing the battery door, be sure to keep the black rubber o-ring seated in the groove on the case back.

**Why does the Impeller Appear Imbalanced?**  
It is NORMAL for the impeller to oscillate as it comes to a stop. It is NOT imbalanced. Rather, it contains a very small magnet which responds to the earth’s magnetic field. This does not affect the accuracy of the windspeed readings because the magnetic field applies both a braking and an accelerating force which cancel each other. The impeller has been calibrated to be accurate to within at least ±3%.

**High Speed Use**  
After several hours of sustained operation over 25 M/S (~49 KT, 90 KM/H, 56 MPH or 4,923 FPM), your Kestrel will lose some accuracy due to wear of the sapphire bearings in the impeller assembly. If you require accurate high AND low speed measurements, we recommend a second impeller.

**Troubleshooting a Damaged Impeller**  
If the impeller rotates, but only “0” or “—” shows on the display, the impeller may no longer be sending a signal to the unit. Test the unit by turning it on and placing it near an electromagnetic source (i.e. back of computer monitor or TV). If the display shows any number other than “0” or “—”, the unit does not need to be returned but does need a new impeller assembly. Contact Nielsen-Kellerman or your place of purchase to order a replacement.

**Replacing the Impeller**  
Press FIRMLY on the sides of the black impeller housing with your thumbs to remove the entire housing. When inserting the new impeller, be sure the arrow is facing the display side of the unit, and is aligned with the top of the meter. Press on the sides of the housing rather than the center.

---

**BEAUFORT SCALE**

The Beaufort Scale is a system for estimating wind force without the use of instruments based on the visible effects of the wind on the physical environment. The behavior of smoke, waves, trees, etc., is rated on a 13 point scale. The scale was devised in 1805 by the British naval Commander Sir Francis Beaufort (1774-1875) and is still commonly used by mariners.

**WARRANTY & SERVICE**

**Warranty**

Your Kestrel is covered by a full parts and labor warranty for one year from your date of purchase. The provisions of this warranty do not apply to: a) batteries, whether contained in a unit or sold individually; b) units which have been subjected to misuse, negligence, accident or improper maintenance or application; or c) units which have been repaired or altered by a party other than Nielsen-Kellerman’s employees or agents without Nielsen-Kellerman’s prior written consent.

**Parts and Service**

To order replacement parts for your Kestrel or obtain warranty service please contact Nielsen-Kellerman or your original place of purchase.

---

**ADDITIONAL INFORMATION**

**What is a “Kestrel”?** The American Kestrel is the smallest North American falcon. Beautiful and highly adaptable, it can be found virtually everywhere in North America. It is unique among falcons for its ability to both hover at very low speeds and dive at very high speeds.

Assembled in the USA. The Kestrel 1000 is protected by US Patent 5,783,753. Nielsen-Kellerman reserves the right to change product specifications. © 1999. Kestrel, Pocket Wind, the Kestrel logo, NK and the NK logo are trademarks of the Nielsen-Kellerman Co.
