FALL WINTER 2023 CANDELA Collection

## CANDELA

FW 23/24 COLLECTION

CANDELA, the opening collection of the year, encapsulates the emotion of the celebration of our 10th year anniversary in a modern winter that despite the cold is full of brightness and color.

To celebrate something is to live it at its fullest. This collection, from its particular color palette to the construction of its patterns and shapes, is an ode to knowing that what you wear can shape any moment.

The inspiration behind CANDELA is a collection of festivities from the Peruvian altiplano and South Andes. Under ESCVDO's eye for detail and design, an exuberant color palette has been synthesized into two distinctive paths, one pastel like and one of vivid colors, all tied by a foundation of a very particular brown, an essential tone that can be found in almost all the region.

Colonial Jacket / Montera Pants

Marini Knit Set - Sweater / Pants / Scarf

Diablada Knit Set - Sweater / Skirt/ Scarf

Cosmo Jacket

Puno Knit Dress

# ESCVDO

Geometry plays a main role. ESCVDO takes triangles or rhomboids so common in pre-columbian iconography, and add a new layer to them through repetition, volumes or their expression in a series or reversible garments where textile techniques seems to work as a kaleidoscope for heritage.

This is a collection where threads have been in-house designed, with plenty of jacquard fabrics and unique ways of looming. Patronage wise, the complexity of the design is easy to spot: a styler inherited from a period when Spanish techniques were mixing with Andean volumes, becomes contemporary. CANDELA is city wear with details that expand through time and geography.

Sustainability is key in all its variants. The production of the garments, oftenly handmade, is done in collaboration with master artisans from the Peruvian Andes. ESCVDO shows its commitment to care for the planet with zero waste garments, low impact fabrics such as alpaca and with continual collaborations with artisans associations that contribute to the improvement of living conditions for artisans in situations of vulnerability.

In continuation with the brand's admiration and support of local creatives, CANDELA was shot at the Lima studio of Peruvian contemporary artist Miguel Andrade Valdéz, among well-known pieces and works in progress.
