

Tis the Season For. . .

Festive Facts: Due to international time zones, Santa actually has 31 hours to deliver presents to kids worldwide. But, to do so, he must travel at 4,796,250 mph!

Turning up the heat: This year, Electrocube introduced Teflon® Film Capacitors – Polytetrafluoroethylene & Foil and Metallized

Polytetrafluoroethylene. The **433D** and **463D** series work in extremely high temperature applications including avionics, wind generation, high power applications, down-the-hole exploration, turbines and more for temperatures ranging from **-55 °C to +150 °C without derating**. [See details...](#)

New components: In 2016, we'll bring you yet another new high current film capacitor: the **DC-link 958A**. Its ideal for high current power inverter applications that require long life under extreme operating conditions. To learn more, [email us](#).

Holiday greetings: Like Santa, time passes so quickly for all of us. With another year closing and a new one beginning, we reflect on how blessed we are to work with so many wonderful people – equal parts caring, committed and exceptional in their devotion to excellence. To all of you, our customers, distributors, sales reps, vendors and colleagues we say, Heres to a bright new year filled with hope and happiness!

Teflon® is a registered trademark of the DuPont Company.

Look what you're a part of . . .

Valued partners: Excellent service is a part of what we do, so we especially appreciate it in others -- like distribution partner, [Taylor Industrial Electronics](#). Since 1919, its prided itself on top-notch, knowledgeable employees and extensive stock. Helpful and flexible, Taylor provides service taylored to meet its clients needs.

Trade show season: In January, we'll be at [NAMM](#) in Anaheim, CA for a *three-peat*. [See where else](#) you can connect with us for some good old-fashioned face time. Its none too early to [schedule time](#) to meet at [EDS](#).
