

New Product Lines & Applications

Our Custom EMI Filters *take flight* in planes. Our RC Networks *compute* in computers, switchgears, and more. This summer, our components will *get down and dirty* in more new Joint Light Tactical Vehicles (JLTV).

Consistent with what engineers want - and what a [recent supplier interface study](#) by the electronics media giant, AspenCore, -confirms - we've been busy manufacturing new product lines and creating highly valued data sheets. See why the new [958A DC-Link series](#) is an excellent replacement for an electrolytic capacitor.

Our [audio capacitors](#) *rock on* with four new audio-optimized series. Check out:

- Our Red Drop Epoxy Dip audio capacitors. The [RDM series](#) offers high frequency, high current and low ESR in a miniature rugged package. The [RDF series](#) with extended foil is great for high surge currents.
- Our [AEL series](#) that offers high performance and long life, and the [AENP series](#), which boosts classic sounds in a speaker crossover network.

Get inside tips on these [audio crossover networks](#) from our blues and rock guitarist (aka engineering manager).

A Noteworthy Line Drive

We're all about the satisfaction of being really good at what you do. Just imagine the satisfaction of our president, Clay Parrill, when his 12-year-old son caught a line drive during his all-star game in Cooperstown, NY, the village synonymous with baseball. Like our page on Facebook to catch a glimpse of his "[play of the week](#)."

Look what you're a part of . . .

Valued partners: As our influence expands across the country, we welcome Gordon Lowell of Lowell-Kangas & Associates to our network of [sales reps](#). Founded by Gordon's late father and his father's partner, the firm represents manufacturers who sell through electronic distribution, serving OEMs in Missouri, Kansas, Iowa, Nebraska, and central Southern Illinois.
