

Well, well, well. . .

We've done it again!

We held our national sales meeting with our network of [sales reps](#) and [distributors](#) while at this year's Electronic Distribution Show (EDS). An air of camaraderie, connection, info-sharing and fun permeated our annual gathering as the outlook is positive for Q3 and Q4 of 2016. Anticipation is growing for Electrocubes two new, soon-to-be-released audio capacitor lines plus the 744D and B series, a high current series of metallized combination film capacitors ranging from 800v up to 3000v all due out this summer.

For the ninth consecutive year, Electrocube has received high marks for superior quality and delivery performance. Special kudos to Silvia Gonzalez, Production Supervisor, and her team in the Transformers Department where the products

are made that garnered [this award](#).

Were having fun!

Now that the website is mobile, traffic is up. So, we've amped up the content by making our extensive library of data sheets and [tech bulletins](#) dynamic webpages. In this format, they're easier for you to read on mobile devices a growing trend and easier for others to find. And, downloadable printouts or PDFs of the documents are also available on the new pages.

Electrocube is more social media, that is. Many of our individual team members and the [company](#) already are on LinkedIn. Now, we're on [YouTube](#) and Facebook, too. Join the [conversation](#)!

Our team likes to geek out on design engineering and quality manufacturing for our clients. [See why](#) both our Manufacturing and Quality Assurance Managers also love serving our customers and check out what you might find them doing for family fun this summer. Its classic rock, mobster movies, dance recitals, pets and more. . .

Look what you're a part of . . .

Valued partners: Were diligent in selecting our distributors, aligning with those who share our values and priorities. [Beyond Components](#) is a great example of that. And, they have exciting news: they just acquired Nedco Electronics.

With an even vaster array of electronic components, Beyond Components with its Nedco acquisition focuses on creating a great work environment for staff and customers. Like us, they work hard to keep team members thriving for years and years within the company. See how CEO Lou Dinkel [walks the talk](#).
