

Chemical Content Analysis

Date: 02-05-2019

Client: Vitality

Product: Vitality CBD Full Spectrum Lemon 600mg

Batch No: 7253A-FSCBD275600

Lab ID: CBD0189

DOP: 12/04/2019

Visual Inspection:

Pale yellow liquid, translucent.

Method Summary:

0.1ml of sample was measured in a pipette and extracted in Methanol to provide a sample at 0.02mg/ml. CBD content was analysed on an Agilent HPLC fitted with a DAD detector. Content on HPLC was analysed against a standard calibration of CBD, CBN and THC, supplied by Restek, as well as CBDA and THCA supplied by Sigma-Aldrich. The results are presented in Table 1 and Figure 1 below.

| Compound | CAS Number | Concentration (mg/ml) | LoQ (µg/ml) |
|-------------------------------------|------------|-----------------------|-------------|
| Cannabidiol | 13956-291 | 20.22 | 0.1 |
| Cannabinol | 521-35-7 | BQL | 0.1 |
| Delta-9- Tetrahydrocannabinol | 1972-08-3 | BQL | 0.1 |
| Cannabidiolic Acid | 1244-58-2 | 0.37 | 0.1 |
| Delta-9-Tetrahydrocannabinolic Acid | 23978-85-0 | BQL | 0.2 |

BQL, Below Quantitation Limit.

% Content of Sample

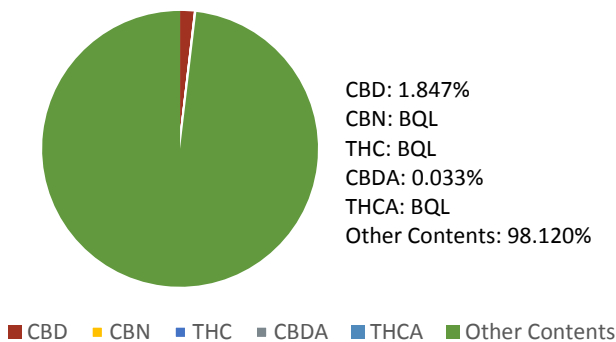

Figure 1. Pie chart of the analysis result.

Comments:

600mg of CBD in 30ml is equivalent to 20mg/ml

Acceptance Criteria: $\pm 5\%$ of target concentration CBD total, including CBDA, below legal limit of CBN, THC and THCA.

CBD- Cannabidiol
 CBDA- Cannabidiolic Acid
 CBN- Cannabinol. The legal limit for this compound is 1mg per container.
 THC- delta-9-Tetrahydrocannabinol.
 THCA- delta-9-Tetrahydrocannabinolic Acid. The legal limit for both THC and THCA this compound is 1mg per container
 The sample passes all acceptance criteria for CBD, CBN and THC.
