

Chemical Content Analysis

Date: 27-09-2019

Client: Vitality

Product: Vitality CBD Full Spectrum Natural 300mg

Volume: 30mL

Batch No: 8094A-FSCBD215300

Lab ID: CBD0310 **DoP:** 08-08-19

Visual Inspection:

Pale yellow liquid, translucent

Method Summary:

0.1ml of sample was measured in a pipette and extracted in Methanol to provide a sample at 0.01mg/ml. CBD content was analysed on an Agilent HPLC fitted with a DAD detector. Content on HPLC was analysed against a standard calibration of CBD, CBN and THC, supplied by Restek, as well as CBDA and THCA supplied by Sigma-Aldrich. The results are presented in Table 1 and Figure 1 below.

| Compound | CAS Number | Concentration (mg/ml) | LoQ (μg/ml) |
|--|------------|-----------------------|-------------|
| Cannabidiol | 13956-291 | 9.77 | 0.1 |
| Cannabinol | 521-35-7 | BQL | 0.1 |
| Delta-9- Tetrahydrocannabinol | 1972-08-3 | BQL | 0.1 |
| Cannabidiolic Acid | 1244-58-2 | BQL | 0.1 |
| Delta-9-Tetrahydrocannabinolic Acid | 23978-85-0 | BQL | 0.2 |

BQL, Below Quantitation Limit.

% Content of Sample

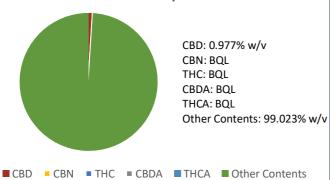

Figure 1. Pie chart of the analysis result.

Comments:

300mg of CBD in 30mL is equivalent to 10mg/mL

Acceptance Criteria: 95-105% of target concentration CBD total, including CBDA, below legal limit of CBN, THC and THCA.

CBD- Cannabidiol

CBDA- Cannabidiolic Acid

CBN- Cannabinol. The legal limit for this compound is 1mg per container.

THC- delta-9-Tetrahydrocannabinol.

THCA- delta-9-Tetrahydrocannabinolic Acid. The legal limit for both THC

and THCA in this mixture is 1mg per container

The sample passes all acceptance criteria for CBD, CBN and THC.
