In-line driver

Mounting

Bulb

Machine Head Light

This is the most often specified Alex Light. It mounts directly to the sewing machine head. This is the best place for a light because the machinist can direct the light beam away from their eyes. This helps make sure the right parts of the eye receive most of the light. The table top is less cluttered and the light vibrates in sync with the machine itself.

Light Source

Bulb Sku:	A4030 SUNLIKE
Light Engine:	LED DWT™ 5.5w / 4,000k
Colour Temp.	4,000k
Life of LED	25,000 hrs approx.
