Bench Mount Light (All in One)

The all-in-one model keeps the electronics contained within the base of the light itself. This is convenient in cases where installing 110-220v above the table-top is not an issue. Supplied with tinned wire ends for hard-wiring to the machine or a universal plug as an option. The light will screw to the table top with the 4 screws supplied or attach to any of the 4 optional base accessories.
