

METAL WALL - INSTALLATION GUIDE

RECOMMENDED TOOLS:

Tape Measure

Pencil

Level

Metal Shears

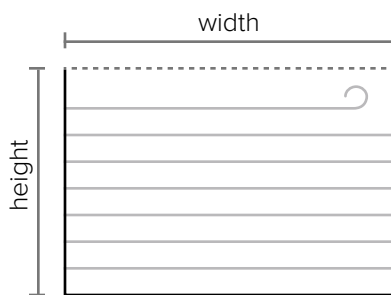

ARTISAN HARDWARE MATERIALS:

Metal Panels

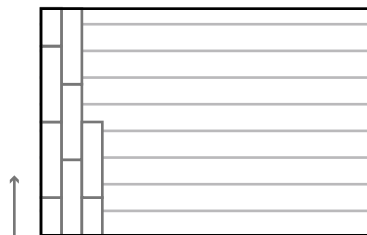

Double-Sided Tape

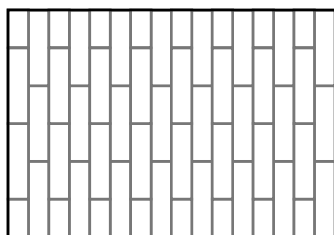

PREPARE

1. Measure the height and width of the wall.
2. Cut strips of tape at wall width to cover every 10" of wall height.
3.

INSTALL

1. Apply level columns of metal panels onto the wall.
2. Mark and cut metal panels for custom lengths.
3. Add more tape to the wall wherever needed.

SHARE
