

INSTALLATION GUIDE / No Show Hardware

(Quantities vary on the size of track and number of doors ordered)

ATTACH WHEELS TO DOOR

*No Show Hardware works with doors 1 1/4" - 2" thick.

1. Measure 7/8" from top of door and 7/8" from side of door to find the placement of wheel. Make a mark for drilling.
2. With a 3/8" drill bit drill through the door on your mark, double check your measurements.
3. Attach wheel assembly to door using the diagram to the left.

ATTACH TRACK TO WALL

1. Determine the centerline height of the track by inserting the track into the wheels and measuring from the bottom of the door to the center of the track, then add 3/4" for door-guide.
2. Locate and mark the studs at the track centerline height and drill 1/8" pilot holes at each marking.
3. If you selected pre-drilled you will not need to drill through the track (move on to step 4). If you selected Non-drilled refer to step 3.
3. Hold the track above the doorway in position and mark the stud locations on the track. Drill 1/4" holes through the top center of the track at the marked points. Include holes 3/4" in from the ends of the track for the door-stops.
4. Hold the track up in position and fasten wood screws through the track and tighten securely into studs.

ATTACH STOPS

Install door-stops at the ends of the track to prevent doors from leaving the track.

1. Place door-stop in the desired location and drill a 1/4" hole into the track for mounting. (we recommend centering the hole 1/2" in from the end of the track)
2. Place bolts through the door-stops then track, with the flags facing outward (opposite from picture). Use nuts to tighten. Apply rubber pads to inner face of the door-stops.

ATTACH DOOR-GUIDE

*Doors must be in contact with door-guides at all sliding positions.

*These instructions are for L-Bottom door-guides. See website for other styles of door-guide.

1. Place the door-guide on the floor central to the door range of motion in the 1/2" grooves along the bottom of the door.
2. Level the door swing and securely screw the door-guides into the floor.

Warning! Choking Hazards. Packaging and hardware includes small parts that can cause choking or suffocation. Keep away from children. Failure to install this product correctly or improper use of tools could result in loss of control, serious injury, or death. Ensure you have complete control of tools at all times. Artisan Hardware is not responsible for any damages or harm caused by improper installation of products. Report damages or material shortages within 48 hours from delivery. Review all terms and conditions before installing products. Results can differ based on environmental circumstances. Use professional contractors who are trained to install this product. Use proper safety gear and follow industry regulations to get the best quality, security, and satisfaction. All hardware must have proper clearance and be securely attached into studs, solid blocking, head casing, full header, or other structural material that is built to bear weight requirements. Always follow industry safety standards and best practices. Every product is custom due to variations in doorway openings and structural factors.
