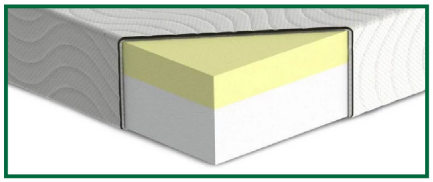
Mattress Purchase Guide

naturenite.com

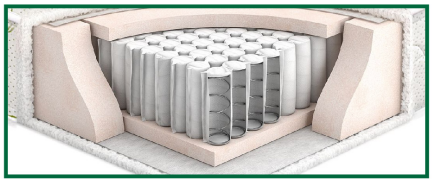
Latex

All-rounder that excel in most features, promising maximum satisfaction. Best in terms of durability and motion reduction. Higher price point but provides the best value for money.



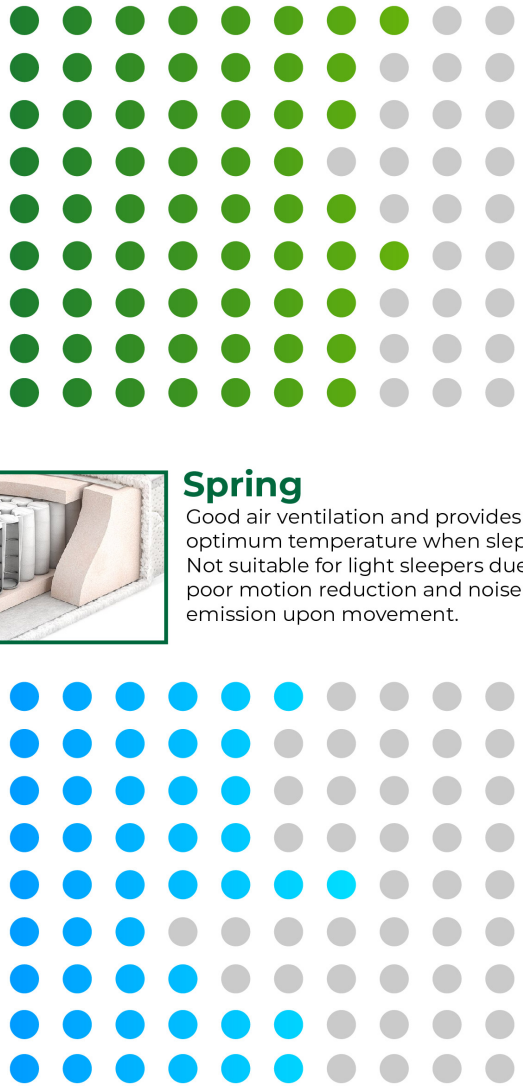
Memory Foam

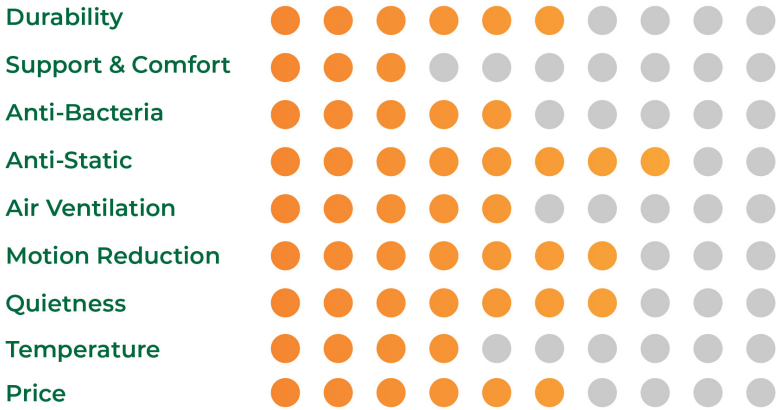
Optimum for static reduction and quietness. High softness level that lowers support and comfort. A more affordable option than latex with good motion and noise reduction.

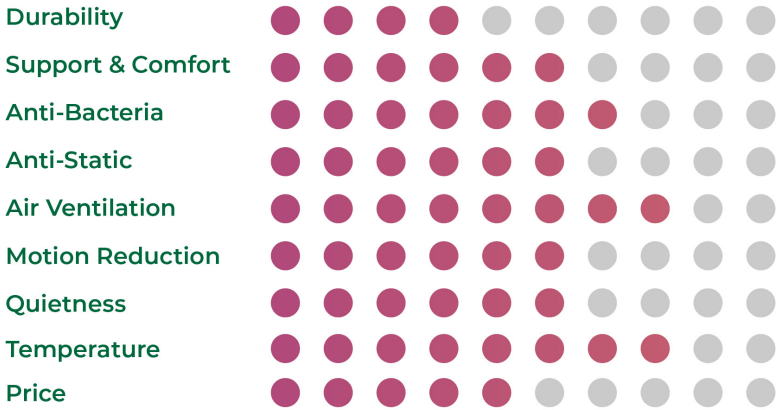


Spring

Good air ventilation and provides optimum temperature when slept on. Not suitable for light sleepers due to poor motion reduction and noise emission upon movement.

Poly Foam






Poly foam mattress is less expensive compared to other mattress types. However, it breaks down quickly, therefore it's not the best choice if you're looking for a long lasting mattress.
