# CLASSES

## CLASS 1

### Minimal Performance

Differentiates the wearer visually from non-complex work environments

## CLASS 2

Typically standard vest, or any garment that does not have tape on the sleeves

Additional high visibility materials and designs define the human form more effectively

## CLASS 3

Must have sleeves with tape that fully encircles them

Offers greater visibility to the wearer in both complex backgrounds and through a full range of body movements

## CLASS E

When worn on its own, garment is not high-vis When worn with Class 2 or 3, the wearer is considered Class 3

# TYPES

GARMENT TYPE CODE	WHAT IS THIS FOR?	ABOUT THE ENVIRONMENT	AVAILABLE CLASSES
TYPE 0	Off-Road and Non-Roadway Use	Pose struck-by hazards from moving vehicles, equipment and machinery	1
TYPE R	Roadway and Temporary Traffic Control (TTC) Zones	Includes exposure to traffic from public access highways, roadway TTC zones, and work/construction vehicles	2&3
TYPE P	Law Enforcement Personnel, Emergency and Incident Responders	Everything from Type R environment, plus additional options for public safety officials that have competing hazards or require access to special equipment	2&3
SUPPLEMENTAL ITEMS	Additional garments and accessories – including pants, overalls, shorts, rain pants, and gaiters – meant to be worn with Class 2 or 3 Garments		E

# CHOOSE YOUR GARMENT

Compliant garments are limited to three fluorescent colors: orange-red, yellow-green or red. Choose a product or system of products that will meet your needs year-round, in all types of weather conditions.
