

Synthetic Round

Quick Tips

1

Without a doubt, the most used brush in the modeling world is a round tipped brush with synthetic hair. AMMO of Mig Jimenez offers a full series of Synthetic Round Brushes in sizes 5/0, 3/0, 2/0, 1, 2, 4, 6, and 10.

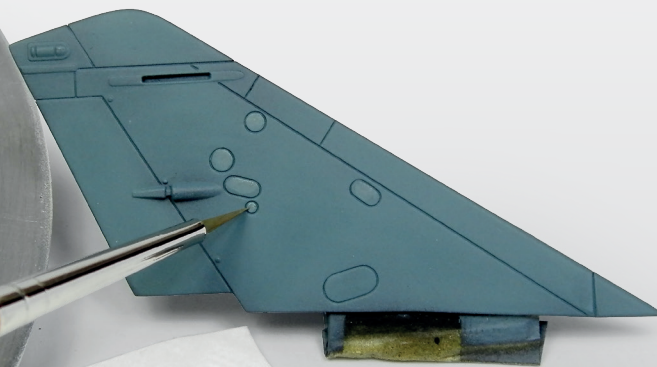

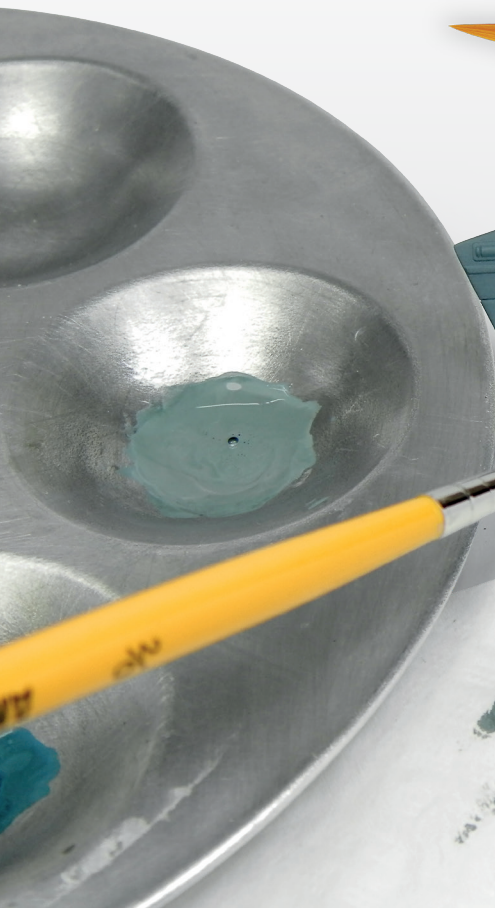

Sin duda, uno de los tipos de pincel más usados en modelismo son los de punta redonda. AMMO nos ofrece sus pinceles de la serie Synthetic Round en diferentes tamaños: 05, 03, 02, 1, 2, 4, 6 y 10.

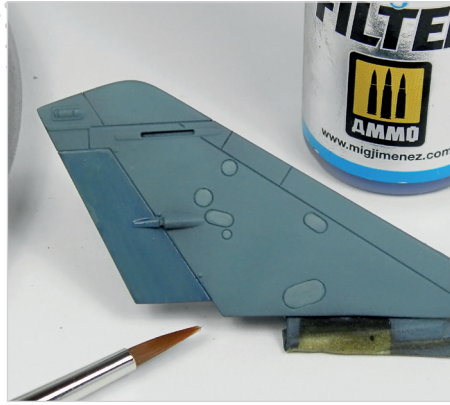

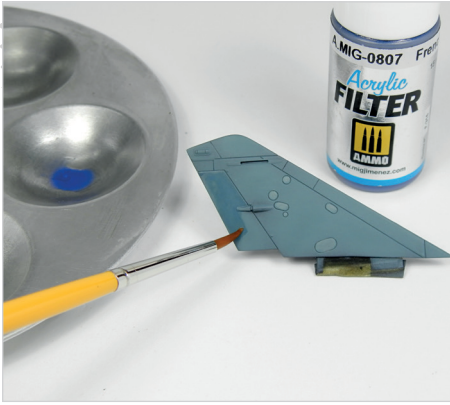

2

These brushes are particularly useful for painting small details such as inspection hatches, rivets, and handles.

Estos pinceles resultan excelentes para pintar pequeños detalles, como registros, remaches, manijas etc.

3

These brushes are ideal for the application of products from the Acrylic Filter series, providing excellent control of the effect.

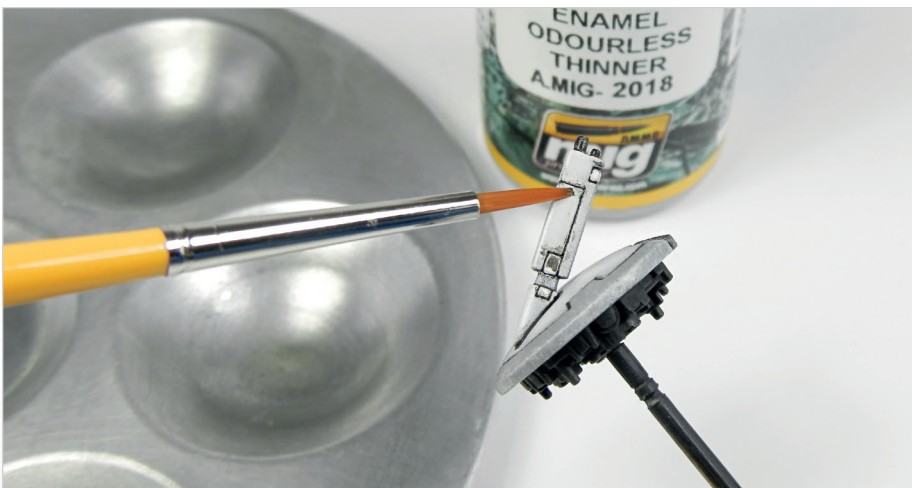

Son perfectos para la aplicación de productos de la serie Acrylic Filter, con ellos conseguiremos un gran control al pintar.

4

These brushes can be used with all types of acrylic paint, regardless of pigment or paint thickness.

Podemos usarlos con acrílicos, independientemente del grosor de su pigmento.

5

The synthetic round brushes are perfect for cleaning weathering enamel products, and they can be used with any type of thinner without damaging the hair.

Son ideales para limpiar esmaltes de envejecido, además de poder usarlos con cualquier tipo de diluyente sin que se estropeen.

6

Yet another use for these brushes is the application of acrylic glues, such as Ultra Glue A.MIG-2031.

También se pueden usar para depositar pegamentos acrílicos como el Ultra Glue A.MIG-2031.
