

FOR: JEEP JKU ATTIC

Welcome! This installation isn't rocket science but it is kind of like karate - you can hurt yourself or break something if you don't pay attention. Used properly, this Install Guide will tell you all you need to know - like Yoda, but with better grammar.

If you have any trouble, contact us for product support: blueridgeoverlandgear.com/pages/contact-us

TOOLS YOU NEED: NONE

STEP #1

Unroll the attic and loosen the 8 straps by sliding the G-Hooks close to the ends of the straps, but leave a 3" tail. These tails will be used to tighten the attic later. Do not remove the G-Hooks from these straps.

STEP #2

Lay the attic on the back of the seat and align it so that the two curved corners face forward and line up with the speakers on the rollbar above. Make sure the paracord lacing is facing downward.

STEP #3

Lift the attic and pass each of the 8 straps over the top of the rollbars** and wrapping them back under, attaching the G-Hooks back to the flat loops on the attic*.

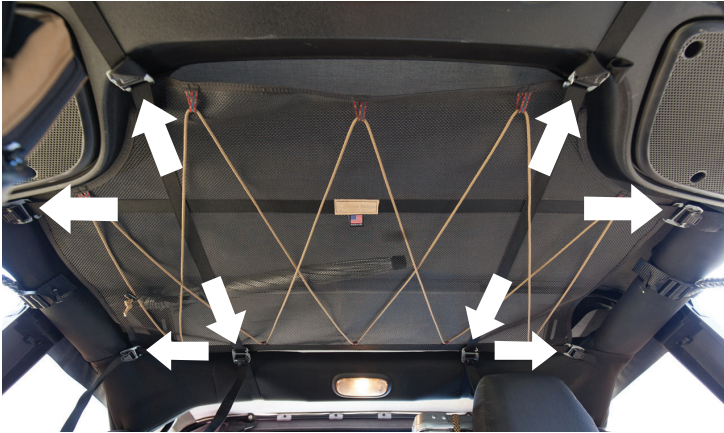

***Note:** Do not attach the G-Hooks back to their straps. They must be attached to the attic itself.

****Note:** If you have trouble passing the straps over the rollbars, we recommend removing the roof first.

continued

STEP #4

Tighten the attic by pulling the tails of the straps (created in Step 1). Pull the straps outward from the center of the attic towards the edge. Be careful to tighten the straps evenly so that the attic stays centered. Make the tails of the straps neat by tucking them behind the straps around the rollbars.

STEP #5

Adjust the cord lock on the paracord lacing to achieve the desired tension in the attic.

STEP #6

Get in your vehicle and go do awesome stuff outdoors!

NOTE: Please make sure not to overload the attic. We also recommend using it to store softer, lightweight items (like sleeping bags, jackets, coats, hats, etc).

Thank you for choosing Blue Ridge Overland Gear. We are handcrafting the toughest bags and organizers for your adventurous life - right here in Bedford, Virginia, USA. It's not just American made, it's 'Blue Ridge Built'!

This product comes with our Rugged Lifetime Warranty. If you have any trouble, contact us for product support: BlueRidgeOverlandGear.com/pages/contact-us
