NON-RETRACTABLE LAP ONLY BELT

Non-retractable or static lap only seat belts are suitable for a wide variety of applications. They are most often used in the centre rear of passenger vehicles (or centre front in the case of a front bench seat). These belts are adjustable with the mechanism in the tongue housing.

Standard belt length	1.2 metres
Long belt length	1.8 metres
Short belt length	Not Available

Buckles are either

Stalk (cable) mounted on the side of the transmission tunnel (vertical surface)

Stalk (cable) mounted on the floor (horizontal surface) – note the anchor plate

Stem (steel plate) mounted on the seat or vertical bracket

Webbing Adjustable Standard (150mm - 610mm) Long (150mm – 950mm)

Buckles are measured in millimetres from the end of the buckle head (red release button) to the centre of the mounting hole of the anchor plate.

Buckle lengths available are

Stalk (tunnel mounted) – 220mm, 250mm, 300mm, 350mm, 400mm, 450mm

Stalk (floor mounted) – 250mm, 300mm, 350mm, 400mm. Right or Left

Stem (seat or vertical bracket mounted) – 100mm, 135mm, 170mm, 210mm

Webbing (fixed length mounted to seat or floor) – 190mm, 275mm, 425mm, 500mm
