

# SteelTailor™ *An ultra cute personal CNC plasma cutting machine*

## Mini-Smart

■ *For plasma cutting*

ISO9001:2008

ISO14000

*Anywhere for your cutting*

Great for processing small workpieces

★ All pictures are for refrence only.

The mini-smart inherits SteelTailor's portable design and is manufactured using SteelTailor components. The open controller and removable body make the assembly without any difficulty. The steel structure body is stable and durable, which is very suitable for the processing of small workpieces. Whether for industrial use or household use, it is very suitable, economical and flexible.

*The supporting legs and beams are removable, so it is very easy to disassemble and assemble. Only one person can install. And also it is very convenient for transportation.*

■ Technical Parameters

Input	220/110V
Frequency	60/50HZ
Power	200W
Controller	LCD 7 "Color screen controller
X axis effective travel	800mm
Y axis effective travel	600mm
Cutting machine table size	1100mm*820mm
Running speed	4000 mm/min
Max cutting speed	3000 mm/min
Plasma torch holder	Standard diameter 35mm
Cutting speed	Depends on plasma and material thickness
Cutting thickness	Depends on plasma power
Cutting table	Simple cutting table (leakage)
Repeatability	0.2mm
Cutting mode	Plasma only
Software	FastCAM standard version( optional)
Controller desktop	Optional

*The cutting table is welded by the whole steel structure, which is stable and durable.*

*Optional controller desktop*
