

A proud Appalachian
start-up!

ConeBuddy® Features

1. Caution tape hooks
2. Glowstick holder
3. Signal flag holder
4. Screw holes (Note: Use screw "Size 10" or smaller)
5. Ensure that the words "ConeBuddy.com" are facing upwards

Note: The ConeBuddy® was designed to function without a screw at Point 3. This hole is an optional feature that can be used to create a stronger connection between the device and the traffic cone.
