

HOLSTERS

CONCEALMENT

This Safariland Chest Rig (SCR) is an add-on part for Safariland® holsters. The SCR replaces the standard belt attachments for 6TS and 7TS holsters and places the holster system on the chest for adaptive accessibility. The SCR allows for three-hole pattern holsters and accessories (like the Safariland Quick Locking System) to be canted for optimal accessibility of the firearm. The SCR is supported by three 1.5" nylon straps and connects with a quick attachment buckle for easy one-handed securement.

CHEST RIG MODEL

FEATURES_

- Three-strap securement with a chest rig holster mounting platform
- SCR replaces the standard belt attachments on Safariland® holsters for increased accessibility
- Quick attachment buckle for one-handed securement
- Made from a specialized injection molded TPE for durability and flexibility
