TACTICAL COMMUNICATIONS

INTRODUCTION

Safariland's trusted line of tactical communications headsets and accessories are used within all branches of the U.S. Armed Forces as well as military, defense, law enforcement, and other markets across 60 countries.

Founded by real-world operators over 27 years ago, the TCI line of Safariland communications products has earned a reputation for designing and manufacturing innovative and customized communications solutions for law enforcement and military professionals. A longstanding commitment to development with customers has ensured the most comprehensive understanding of communications requirements in the industry. Safariland's best-in-class communications solutions are an integral part of The Safariland Group's mission of, "Together, We Save Lives.™"

CUSTOMIZED SOLUTIONS

In addition to our diverse product line, we design and manufacture custom communications systems for specialty requirements and missions. We look forward to discussing your specific needs and delivering exceptional tactical communications solutions purpose-built for your requirements. For our full line of communications solutions, visit our website at www.safariland.com.

HEADSET TEST & EVALUATION PROGRAM

Safariland is pleased to offer a 30-day test and evaluation (T&E) tactical headset program for law enforcement, military, and government. Please see page 25 for more details.

NEW LIBERATOR SERIES

The Safariland Liberator® IV, Liberator® V, and Liberator® HP elevate tactical headset technology to the next level through advancements in both communications technology and hearing protection. These multi-mode electronics packages include features such as human speech isolation and Near Field Communications wireless firmware with updated signal processors. The headsets also provide enhanced hearing conservation in all environments, including protection from impulse/gunfire noise and high decibel constant background audio.

Advanced threat localization offers maximum situational awareness and threat detection. Updated physical features include glass polymer injection-molded Earcups, and a universal modular headset suspension system that allows users to transition between rear helmet rail mount, over-the-head, or behind-the-head wear with no tools in under a minute.

Coupled with proven Push-to-Talk and cable systems, the Liberator series headsets are compatible with over 250 different tactical communications sources.

ADVANCED DUAL COMMUNICATIONS HEADSETS

LIBERATOR® V

The Liberator V™ headset is a secure dual communications system offering exceptional hearing protection and key technological advancements. New features include the multimode headset with Electronic Noise Compression and Active Noise Cancellation, and Dual Fuel technology which enables the headset to run on two AAA batteries or one CR123 battery. The Liberator V is 100% designed and manufactured in the US, and is the only model with user audio profiles modifiable with simple keystrokes on the headset.

FEATURES

- First of its kind multi-mode headset: Electronic Noise Compression and Active Noise Cancellation
- Backward compatible with TCI dual communications systems

- Industry-leading sound localization for maximum situational awareness and threat detection
- R.4 dual communications Push-to-Talk available - compatible with R.A.C.E.
- Upgradeable and updatable firmware using NFC technology
- Proprietary high-definition speakers and speaker enclosures
- Advanced RF and TDMA PCB protection technology
- Boom microphone featuring noise-canceling and shielding protection
- Two headset suspension options
- Modular headset suspension - User-adjustable with no tools for either over-the-head, behind-the-head, or helmet rail mounted (rail mounts included)
- Over-the-head comfort fit - Traditional over-the-head for low-cut helmets
- Proprietary Earcup design layered with sound barrier technology

AN-VIS/NVG COMPATIBLE INTEGRATED MIC LIP LIGHT	Yes - ITJCS and BASIC with left boom mic mounts only
BATTERY LIFE	Up to 400 hours (based on Audio Mode Selection)
ACCESSORIES	Comes with radio interface cables, R.4 dual Push-to-Talk, and nylon transport bag
RADIO COMPATIBILITY	Supports over 250 radio models and manufacturers

The Liberator V dual comm tactical headset is available in a range of variations, each with unique characteristics, capabilities and benefits to meet user-defined needs.

LIBERATOR® V ITJCS

FEATURES

- Modular system includes additional quick disconnect accessory cables
 - Two 14" straight radio interface cables allow use of two audio sources simultaneously
 - One 17" coiled radio interface cable for manpack radios
 - One Y multi-function audio splitter cable for radio sharing or audio recording
 - One modified H250 handset for radio sharing or backup audio accessory
 - One 6' vehicle radio interface cable
 - One NATO plug headset adaptor cable
- R.4 dual communications PTT allows for connection of additional accessory cables (sold separately) such as various vehicle intercom system interfaces and cell phone attachments
- Includes nylon transport bag (Berry Compliant)

LIBERATOR® V LITE

FEATURES

- Two fixed 17" coiled radio interface cables allowing use of two portable radios simultaneously
- Includes nylon transport bag (Berry Compliant)
- IP68 Certified

TACTICAL BT MODULE FOR LIBERATOR V

Wireless audio devices can be paired with the Liberator V tactical headset using the R.4 dual communications Push-to-Talk (PTT) audio accessory.

The proprietary wiring scheme of the wireless module, along with the patent pending R.A.C.E. feature, allows cell phones to work seamlessly with tactical communications, both encrypted and unencrypted.

FEATURES

- Music and cell phone continuous operational time: 8 hrs
- Standby time: 10 days
- Charge time: 1 hr (lithium ion battery)
- Range: 33ft (10 meters)
- Compatible wireless profile: A2DP, AVRCP, HSP, HFP
- Multi-point pairing
- IP67 rated: dustproof and water submersible for up to 30 minutes
- Programmed with voice prompts for calling and power status
- Utilizes standard COTS 3-button wireless interface that includes accepting calls, dropping calls, and cycling music playlists
- Includes Micro-USB charging cable
- Impedance agnostic
- Also available for the Liberator® III headset

LIBERATOR® V BASIC

FEATURES

- Supports both military and law enforcement radios
- Modular system includes additional quick disconnect accessory cables
- Two 14" straight radio interface cables allow use of two audio sources simultaneously
- One NATO plug headset adaptor cable
- Allows capability to plug two audio sources in simultaneously
- R.4 dual communications PTT allows for connection of additional accessory cables (sold separately) such as various vehicle intercom system interfaces and cell phone attachments
- Includes nylon transport bag (Berry Compliant)

ADVANCED SINGLE COMMUNICATIONS HEADSETS

LIBERATOR® IV

The Liberator® IV multi-mode, single communications headset is completely designed and manufactured in the USA. The Liberator IV features a Dual Fuel system allowing it to run on either two AAA batteries or one CR123 battery.

The headset offers operational modes for all high noise situations, and protects hearing from impulse/gunfire noise and constant, high-decibel background noise. The Liberator IV is the first headset with user audio profiles modifiable with simple keystrokes on the headset.

FEATURES

- First of its kind multi-mode headset: Electronic Noise Compression and Active Noise Cancellation
- Incorporates same features of Liberator V in a single communications channel package
- Backward compatible with TCI single communications systems

ACCESSORIES	Comes with radio interface cables, R.4 dual Push-to-Talk, and nylon transport bag
RADIO COMPATIBILITY	Supports over 250 radio models and manufacturers

The Tactical BT Module will provide great cell phone clarity, and the ability to efficiently utilize a cell phone without removing the phone from your pocket or pouch.

HEARING PROTECTION

LIBERATOR® HP

ADVANCED HEARING PROTECTION

The Liberator® HP headset is the next generation in electronic hearing protection, offering crisp, clear audio in a durable, scratch-resistant, slim earcup.

The Liberator HP provides enhanced hearing protection in all environments, including those with impulse/gunfire noise and high-decibel, constant background audio. The wearer is protected while advanced sound localization allows for maximum situational awareness and sound detection.

The glass polymer, injection-molded, slim earcups provide excellent durability and is the base earcup for the Liberator IV and V headsets. The Liberator HP can be sent in and converted (for an additional charge) into either a single or dual comm headset. Once the headset has been converted to a Liberator IV or V, a Push-to-Talk (PTT) can also be purchased separately and added to the system.

The LIB HP is also available with a rechargeable battery, LIB HP-R.

COLORS

FEATURES

- First of its kind multi-mode adjustability providing Active Noise Reduction (ANR), Active Noise Cancellation and both simultaneously
- 3 Distinct hearing protection modes:
 1. ENHANCED MODE Blocks dangerous impulse noise, while enhancing nearby speech and audio
 2. MOVE MODE Blocks all external noise
 3. CLARITY MODE Blocks all external noise, while enhancing nearby speech and audio
- Industry-leading sound localization for maximum situational awareness and sound detection
- Slim earcup design layered with sound barrier technology
- High-definition speakers with enhanced electronics
- Speed-change battery compartment works with either two AAA batteries or one CR123 battery
- 160-300 hour run time (mode dependent)
- Noise reduction rating (NRR) of 26dB
- Easily converts to behind-the-head or helmet mount suspension (purchased separately)
- Designed, engineered, and manufactured in the USA

LIB HP-R also includes:

- Rechargeable battery using standard USB-C
- Up to 80 hours of operation
- Quick charge capabilities
- No need to ever purchase or replace batteries

TACTICAL HEADSETS

TABC III™ DUAL COMMUNICATIONS TACTICAL ASSAULT BONE CONDUCTION HEADSET

The TABC III (Tactical Assault Bone Conduction) headset is a binaural headset with dual bone conduction transducers that provide excellent natural sound perception, without impairing peripheral hearing or affecting situational awareness. The headset offers tactical teams exceptional performance, comfort, and durability in a smaller silhouette.

FEATURES

- Proprietary Binaural Dynamic Audio Resonance System “DARS” sound reproduction system that provides pristine audio fidelity that bypasses the eardrum and goes directly to the cochlea through the mandible (jaw bone)
- State-of-the-art, bone-to-bone conduction transducers and noise-canceling boom microphone
- Supports military or law enforcement/first responder radio systems
- Tactical Push-to-Talk (PTT) included; dual communications version upon request
- Lightweight, adjustable headset fits under ballistic helmets or other non-ballistic rigid or soft headgear
- Designed to leave user’s ears unobstructed for natural situational awareness and peripheral hearing

COMMUNICATIONS CAPABILITY	Single or Dual
RF SHIELDING / FILTERING	Yes
MICROPHONE CONFIGURATIONS	Left side
HELMET COMPATABILITY	Various MICH, ACH-Warrior and Popular styles
COMPATIBLE WITH O2 MASK OR GAS MASKS	Yes – When option is ordered as add-on
COMPATIBLE WITH O2 MASK	Supports over 250 radio models and manufacturers
SUSPENSION SYSTEM TYPES	Behind-the-head (BTH)
ACCESSORIES	Comes with TCI PTT and Storage Bag
RADIO COMPATIBILITY	Supports over 250 different radio interfaces and manufacturers

TECS

TACTICAL ENFORCEMENT LOW-VISIBILITY MODULAR EARPIECE

The TECS (Tactical Enforcement Communications System) was designed to meet the needs of Special Enforcement Units and tactical personnel seeking a versatile headset system. The lapel microphone and earpiece system can be the basis for a low-profile communications system, or to add a level of scalability to any of our other tactical communications accessories. The TECS can be re-configured with one of our other tactical headset styles as desired, with no additional modification needed.

FEATURES

- Crystal clear audio delivered to inner-ear using Soundwaves/FC R4 Earcoil and choice of Ear-Insert types
- Noise-canceling/waterproof microphone
- Push-to-Talk (PTT) assembly included
- Supports military or law enforcement/first responder radio systems
- PTT compatible with other TCI headset products allowing future augmentation of the system and capabilities
- Excellent field durability; supplied with flexible cables
- Available with comms adapted Impulse Tips – Automatically engages to protect hearing from impulse noise but still allows for ambient audio in normal sound environments

COMMUNICATIONS CAPABILITY	Single or Dual
HEARING PROTECTION	Yes, with Sound-Attenuation Ear-Insert
RF SHIELDING/FILTERING	Yes
NOISE REDUCTION RATE (NRR)	Yes, NRR 21 with Sound-Attenuation Ear Insert
AUDIO RECEIVE FEATURE	Soundwaves/FC Earcoil with your choice of TCI Ear-Insert
MICROPHONE CONFIGURATION	Noise Canceling, Waterproof Microphone with Clothing Clip
HELMET CAPABILITY	Various MICH, ACH-Warrior and Popular styles
COMPATIBLE WITH O2 MASK OR GAS MASKS	Yes – When ordered with add-on option
ACCESSORIES	Comes with TCI PTT and Storage Bag
IMPULSE COMMS ADAPTERS	Up to 33 dB protection, 13dB continuous reduction

FRONT LINE COMMS

The Safariland® Mobile Field Force Front Line Comms System addresses communication and audio challenges law enforcement officers have typically faced during protests, demonstrations, and riots. The Front Line Comms is a “listen-only” system that improves audio intelligibility in loud environments. Utilizing existing patrol speaker microphones, this is a cost-effective solution that ports high-quality audio directly into the operator’s helmet.

The Front Line Comms System is easily installed into the Safariland® 906 / TR1000 Riot Helmet, ProTech® Delta Series Full Cut helmets, including the Delta 4™, and the PASGT helmet systems. It can also integrate with all other non-ballistic crowd control helmets on the market.

FEATURES

- Improves audio intelligibility in loud environments
- Cost-effective solution that utilizes existing patrol speaker microphones
- “Listen-only” system that ports high-quality audio directly into the mobile field force helmet
- Easily installed on the Safariland® 906 / TR1000 Riot Helmet, ProTech® Delta Series Full Cut helmets, and the PASGT helmet
- Integrates with all other non-ballistic crowd control helmets on the market
- Military-grade, ruggedized cables
- Uses standard 3.5mm connection

LINEBACKER COMMS

The Safariland® Linebacker is part of the Mobile Field Force product line. These products are specifically built to address communication and audio challenges law enforcement officers have faced during protests, demonstrations, and riots. The Linebacker system provides audio intelligibility in loud environments and includes a noise-canceling microphone for the clear transmittal of two-way communication. Utilizing the NATO connection, this system is compatible with existing PTTs (Push-to-Talk) or is offered as a kit for those without a PTT.

The Linebacker Comms System is easily installed into the Safariland® 906 / TR1000 Riot Helmet, ProTech® Delta Series Full Cut helmets, including the Delta 4™, and the PASGT helmet systems. It can also integrate with all other non-ballistic crowd control helmets on the market.

FEATURES

- Improves audio intelligibility in loud environments
- Noise-canceling microphone for clear transmittal of 2-way communication
- Easily installed on the Safariland® 906 / TR1000 Riot Helmet, ProTech® Delta Series Full Cut helmets, and the PASGT helmet
- Integrates with all other non-ballistic crowd control helmets on the market
- Military-grade, ruggedized cables
- Available with Avon gas mask connection
- NATO connection for use with existing PTTs or available as a kit

MOBILE FIELD FORCE

LIBERATOR MOBILE FIELD FORCE

The Liberator Mobile Field Force kit provides top-tier hearing protection, flawless communications, and situational awareness in a highly durable package, providing a tactical advantage for Mobile Field Force Operators. The MFF allows operators to hear radio communications clearly along with surrounding audio, even in the loudest environments. A standard 3.5mm connection makes the Liberator MFF compatible with all common remote speaker and shoulder microphones. Extremely durable with certifications under 12 Mil-Spec 810G methodologies, even water, excessive heat and cold, dirt, sweat, and other debris will not impact the reliability of the Liberator MFF. The MFF headset includes Safariland premium Gel Ear seals for long-wear comfort and durability and provides a more economical alternative to tactical headsets with all the same capabilities.

Available for helmet mount and under the helmet configurations

FEATURES

- Connects to existing remote speaker microphones
- 720-degree situational awareness
- Fits under most helmets
- Available with helmet mount options
- Mil-Spec durability
- Up to 400-hour battery life or 80 hours rechargeable
- Dual-cell battery compatibility with either two AAA batteries or one CR123 battery
- Noise Reduction Rating of 25NRR
- Adaptability for additional application usage
- Proprietary enhanced Gel Ear seals
- Designed and manufactured in the USA

PATROL HEADSETS

TWO-WIRE PATROL KIT

The Two-Wire Patrol Kit takes the best attributes from our special operations tactical headsets and gives law enforcement personnel and other professionals a high quality, lightweight, communications option for day in - day out use. This kit includes moisture inhibiting coiled acoustic tubing that can be used for surveillance or as a lightweight replacement for the bulky shoulder-worn speaker microphone handset.

The Two-Wire Patrol Kit offers organizations a cost-effective solution for general use, and a simple low-visibility system for plainclothes operations, and/or department-wide issue.

FEATURES

- Quick-detach HIROSE connector between the wire kit and the radio interface
- Cable lengths optimized for threading through suits, uniforms, body armor, and other tactical apparel
- Two earpiece types included: silicone gel tip for partial

10-2 RECEIVE ONLY KIT

This high-quality and affordable receive only earpiece kit provides seamless audio directly from an operator's remote speaker microphone via the 3.5mm receptacle. The kit offers isolated audio with better reception in loud-noise situations.

- occlusion and foam tip for full occlusion and comfort
- In-ear tips provide better sound clarity, require lower radio volume and increase radio battery run-time
- Available for Motorola XTS and APX radios; other radios available upon request
- Lightweight (less than 2 oz.)

FEATURES

- Earpiece kit provides seamless audio directly from an operator's remote speaker microphone
- Isolated audio for enhanced audio reception in loud noise situations
- Compatible with any remote speaker mic with a 3.5mm non-threaded receptacle
- Allows officer to leave portable radio volume turned on while in the vehicle
- Includes moisture-inhibiting acoustic tubing, durable 14" coiled 3.5mm cable, acoustically enhanced audio transducer and three semi-custom Earmolds in sizes: Small, Medium, and Large

CIPS KIT

COVERT IN PLAIN SIGHT KIT

The CIPS (Covert in Plain Sight) Kit enables plainclothes officers to remain covert when they need to communicate via a tactical radio, by wearing earbuds commonly associated with smartphones and MP3 players, which blend in with civilians using earbuds. The tactical radio is connected to a mini Push-to-Talk (PTT) Sniper Ring, so the officer is able to key the radio and use the microphone in the smartphone headset without any indication to outsiders that a tactical radio is in use.

FEATURES

- Provides plainclothes officers a solution to remain covert when communicating via a portable radio
- Cable lengths optimized for threading through clothing
- PTT available in Beige (exclusive) and Black
- Quick detach system to transition to personal electronics
- Lightweight (less than 2 oz.)
- Available for Motorola XTS, APX radios and Harris P5300/XG-75; other radios available upon request

PUSH-TO-TALK

PTT PRODUCTS

We offer a wide array of Push-to-Talk (PTT) assemblies to fit customer needs. There are PTTs to replace, retrofit, or update existing TCI products, including headsets, earpieces, and headsets of other vendors (MSA, Sordin, Peltor, Atlantic Signal, TEA, etc.).

PTT assemblies for use with various aircraft and vehicle intercom and communications systems are also available. Seamlessly integrate these PTTs into your existing TCI headset system to use with a vehicle/aircraft communications system, communicate with teammates in a high noise environment, and retain the ability to exit the vehicle and easily transition to portable radio systems. Cables and communications assemblies offered integrate with VIC-3, LVIS, NATO standard aircraft ICS, and civilian aircraft ICS systems.

SINGLE

DUAL

REMOTE SNIPER

Most tactical PTT's come with the ability to add an optional Sniper (finger-worn) Push-to-Talk. The Remote Sniper PTT provides an operator with the ability to remotely key with radio, which is perfect for hands-free PTT activation while handling SMG's, shotguns, precision weapon systems, military free fall applications, or ballistic shields.

APTT

ALPHA PUSH-TO-TALK

FEATURES

- Gas mask connectivity comes standard
- Various options available such as cell phone, volume control, and remote PTT functionality
- Includes ambidextrous MOLLE loop-attachable clothing clip
- Utilizes the legacy U94 form factor with more advanced and reliable construction
- Available with 18" radio interface cable and 2-pin gas mask receptacle

MODULAR ANTENNA SYSTEM TACTICAL

M.A.S.T.

The Modular Antenna System Tactical (M.A.S.T.) allows tactical operators to relocate and remote their radio antennas to improve line-of-sight (LOS) communications, reduce the potential for interference caused by certain types of radio antennas and decrease visual obstructions caused by radio antennas. M.A.S.T is extremely durable, and built to withstand the harshest operational environments.

FEATURES

- Universal antenna harness mount attaches to any modular webbing system using the included MALICE Clip®, keeping the antenna secured properly, preventing any accidental repositioning during maneuvers
- Factory black-plated connectors prevent unwanted shine or reflections
- Compatible with any of the primary MBITR, PRC-152, PRC-154 antennas, as well as other selected antennas used with public safety radios like Motorola XTS2500,

XTS3000, XTS5000, APX6000, APX7000 and specified Kenwood radios

- Available in Black, OD Green, Coyote Tan, and Foliage Green
- Version 1: TNC-M to TNC-F
- Version 2: TNC-M to BNC-M with BNC-TNC quick disconnect adaptor available in straight or 90 degrees
- Version 3: 12' BNC-M to BNC-F SATCOM cable
- Version 4: SMA-F to SMA-M
- Version 4 DOJ: BNC-F to SMA-M with SMA-F to BNC-M quick disconnect adaptor
- Version 5: (Waterproof IP68) TNC-M right angle to TNC-F
- Includes cable, M.A.S.T. antenna harness, and MALICE Clip
- Compatible with modular webbing systems
- 24" or 42" high-durability overmolded cable options available
- Compatible with military radios with TNC connections, or law enforcement/first responder radios with SMA connections

HEADSET TEST & EVALUATION PROGRAM

Safariland is pleased to offer a 30-day, free-of-charge, no-obligation test and evaluation (T&E) tactical headset program for law enforcement, the military, and the government. The program allows customers to perform product testing independently throughout the 30-day demo period. The evaluation assists customers in confirming which communications product is most suitable and fits the unit's collective preferences.

Contact a Customer Service representative at customer@safariland.com or by calling 800-347-1200. You may also scan the below QR code for the form.

Safariland will provide a return email acknowledging your T&E request and also include a link to our exclusive T&E smartphone or tablet application with login ID and password. Safariland encourages end users to utilize this interactive evaluation application while conducting field trials. We invite qualified units to try our products today. We are confident you will hear The TCI Difference.

DOWNLOAD OUR T&E REQUEST FORM

Due to increased use of non-lethal crowd control devices and gas deployment, we offer several cost-effective products to integrate an issued gas mask with tactical communications accessories properly. These products are easy to use, don and doff, and can be stored with the officer's gas mask for extended periods. The gas mask adaptor and mobile field force kit provide a simple solution to ensure officer safety when protective equipment is used.

GAS MASK SOLUTIONS

GMA GAS MASK ADAPTER

FEATURES

- An economical and easily operated integration solution
- Easily connects to existing communications systems
- Can be left connected to the end user's gas mask until needed
- No modification to existing gas mask or communications accessories required
- Available in Black

THE LIBERATOR® ADVANTAGE PROGRAM

The Liberator® Advantage program provides enhanced protection for your headset. Under this program, Safariland provides comprehensive operational performance protection for three years from date of purchase. Whether a headset is tested to the extreme or experiences an unexpected accident, the Liberator® Advantage program has it covered.

- MSRP: \$199 Per Headset
- 3 Years Protection
- Covers Any Damage to the Headset
- Does NOT Replace Lost or Stolen Equipment
- Free round trip overnight shipping
- Repair or Replace Headsets
- Replacement Headset Shipped Within two (2) business days of return
- Available for NEW Purchases
- Eligible For Liberator® IV, and V

LIMITED WARRANTY

Safariland, LLC warrants its Safariland TCI products to be free from defects in materials and workmanship under normal use or service for 90 days following date of purchase for listen-only earpiece products; and one (1) year for all other products. If a product proves to be defective in materials or workmanship, at our discretion we will repair or replace the product and send it to you at our expense. This LIMITED WARRANTY applies only where the products have been properly maintained in accordance with TCI brand instructions and have not been subject to misuse, negligence or accident. All returns must be authorized by the Returns Authorization Department and must include the proof of purchase and documentation specifying the claimed defect. Prior to return please contact us at 800-347-1200 for an RMA number. This warranty is given in lieu of all other warranties express or implied, which are specifically excluded, including warranties for merchantability or fitness for a particular purpose. In no event shall seller be liable for incidental or consequential damages to the full extent such may be disclaimed by law. See full text of the Limited Warranty on Safariland.com/warranties.

REPAIRS

We do provide reasonable and discounted repair services for non-warranty repairs and, subject to approval, repair product manufactured by other companies as a courtesy to our customers. A Return Material Authorization number (RMA) is required when ANY item is returned for any reason. The assigned RMA number must be visible on the outside of the package or the package could be rejected and returned at your expense.
