

Nylon EDC NexBelt®

BELTS

Designed for the firearm industry but can be used for any field that requires attaching tactical and technical equipment and tools to your belt. Our nylon belts are manufactured with high-density nylon of an advanced composite of ultra-fine polyester for extra stiffness and durability. In addition, our belts have a water-repellent liner to stop sweat from seeping and staining the surface of the belt. For our leather versions, the belt backing is made with the same durable nylon backing. Now you can conceal in comfort and style.

FEATURES

- One handed, on the fly, belt adjustments, especially useful when putting on, or removing an IWB holster
- 1/4" incremental belt adjustments instead of standard 1" adjustments
- Heavy-duty high-density nylon, for extra stiffness and durability for everyday carry of firearms
- Water repellent liner
- One size fits majority of people, up to 50" waist, simply cut off excess and install buckle
