

Congratulations on your PROTECH™ Tactical ballistic shield! Please refer to the instructions below for the shield support component designed to be utilized with most NIJ 0108.01 Type III and IIIA PROTECH™ Tactical ballistic shields, 36" in length or less.

SHIELD SUPPORT HOOK

Snap-on strap easily pulled through desired location on carrier webbing

Secondary adjustable strap for personalized fit and shield length

L shaped resting hook for Type IIIA and III Shields

Custom length and positioning for shields 36" in length or less

Proper use reduces carrying fatigue during extended periods of shield deployment
