

PYRAMID

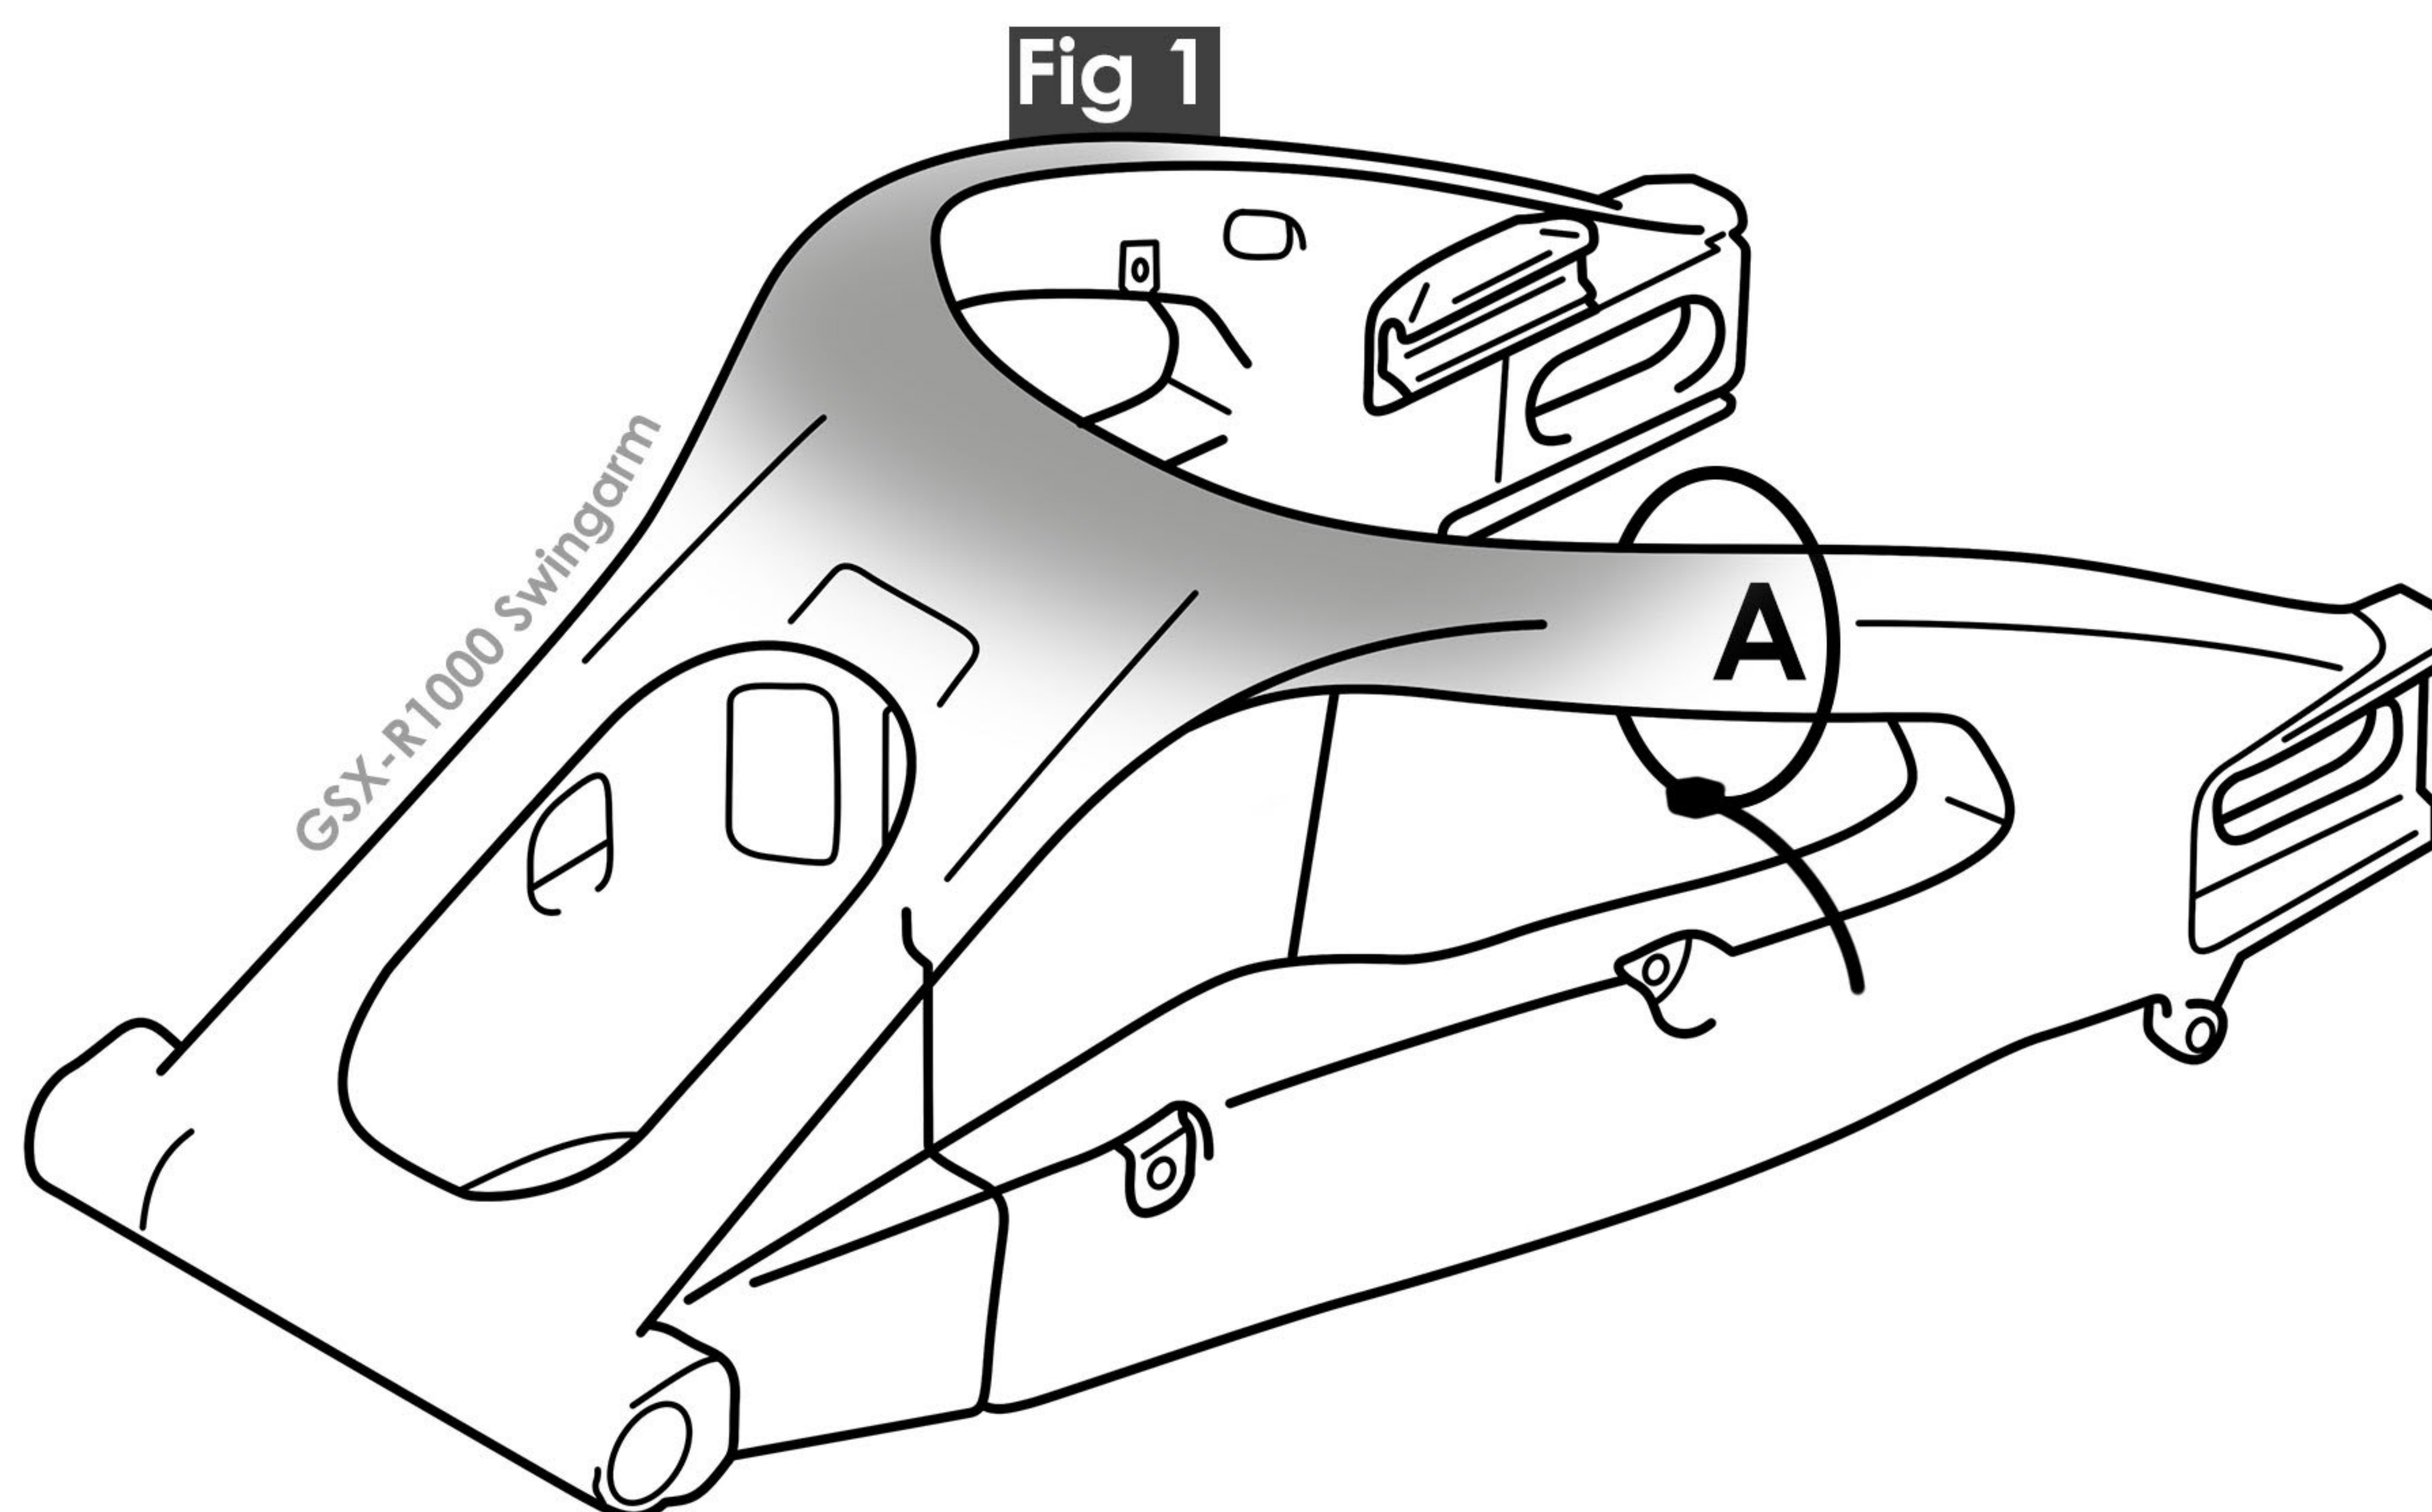

070406 Suzuki GSX-R1000 Hugger Fitting Instructions

Kit Includes:

4X 200mm X 4.8mm Cable Ties

CAB0200

- Position the Pyramid Hugger over the swingarm (see **GREY** area of **Fig 1**).
- Feed a cable tie through one of the small rounded slots on the Pyramid Hugger and then through the gap in the swingarm (see **A** in **Fig 1** - this shows the cable tie passing through the gap in the swingarm). Repeat for the other 3 slots in the Pyramid Hugger.
- **Do not fully tighten the cable ties until all 4 cable ties are loosely in place on the hugger.**
- Once all of the cable ties are loosely in place, make final adjustments to the Pyramid Hugger to make sure it is correctly positioned on the swingarm. Only once you have checked this should you fully tighten the cable ties and secure the Pyramid Hugger in place.
- The last step is to trim any excess from the cable ties.
