

## 51000 Suzuki GSX-8S 2023 Tail Tidy Fitting Instructions

### Kit Includes:

1X Tail Tidy + Fitting kit

Fitting this Tail Tidy is simple - If in any doubt, seek help from a qualified mechanic

### Assembly Instructions:

- Begin by removing the original Licence Plate Holder.
- Remove the seat and then unplug the rear light, licence plate and both indicator connectors from the bike's loom (located on the right hand side of the bike)
- Remove the push rivets that hold the plastic guard in place, then remove the rear black plastic cowling by removing the 2 self tapping screws on the top and the 2 push rivets underneath.
- Remove the 4 screws securing the original licence plate holder and the metal cover under the bolts.
- To remove the original hanger, push the back of the hanger down until the 2 plastic mounting tongues pop out from the rear moulding. Be cautious not to snag the wiring.

### Reusing OEM Indicators?

Disassemble and remove the OEM indicators from the original licence plate holder.

Proceed to fit the OEM indicators to the Tail Tidy.

- Fit the new stop/brake LED to the new Tail Tidy ensuring the LEDs used to illuminate the licence plate will point down.
- Insert the original rubber grommet in the new Tail Tidy.
- Feed the 3 wires through the Tail Tidy (rear light wire first as space is limited) and use cable ties to secure neatly to the Tail Tidy.
- Offer up and loosely fix the Tail Tidy to the bike using the M6 bolts and washers supplied. The black plastic spacers locate between the washers and the Tail Tidy. The Tail Tidy should fit flush to the underside of the motorcycle.
- Reconnect the indicators and new rear light to the bike's main loom. The loom side original licence plate plug is no longer used. Use the supplied heat shrink and cable ties to secure neatly under the seat.
- Align the Tail Tidy ensuring that no wiring is snagged, then fix the Tail Tidy in place (Loctite recommended)
- Refit the rear plastic cowling and plastic guard.
- Test the indicators and rear lights to ensure they are working correctly.
- Refit the seat to the bike.
- Fit the number plate to the Tail Tidy.
- Check fixings periodically.
