

812000 Yamaha Tracer 900 & Tracer 900 GT Shock Shield Fitting Instructions

Please note: this product only fits Tracer 900's & Tracer 900 GT's which have the pannier support bracket shown in the image below.

The Pyramid Shock Shield is easy to fit - simply loosen the 4 large bolts holding the bracket in place (see image below) until there is enough space for the part to slip in behind the metal plate.

Please ensure to attach the metal plate back on top of the Pyramid Shock Shield as this allows for a tight and secure fit to be achieved.
