Climbing Triangle Assembly

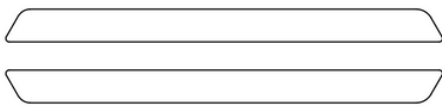

Please FULLY read these instructions before you start assembling the Climbing Triangle.

Note: These instructions work for Small, Pikler, and Jumbo Triangles.

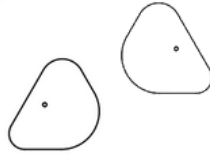

The Parts

Long Legs

Short Legs

Connector
Plates

Dowels
Jumbo x19
Pikler x 13
Small x9

Hex Screws
Jumbo x38
Pikler x26
Small x18

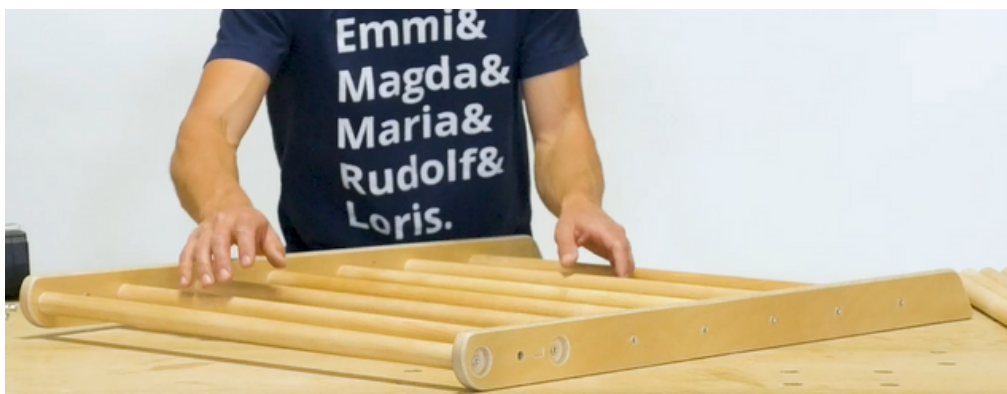

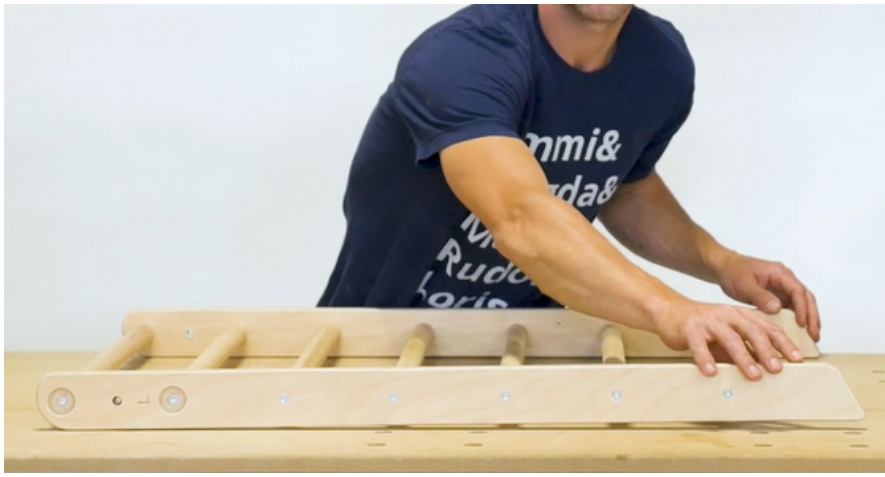

1-1/4" Bolts x2
Washers x2

Secure dowels to long
triangle legs using screws
and either provided wrench
or drill bit

Make sure the 1"
holes are facing away
from the dowels!

With the long leg assembly laying on a flat surface, check to see if it rocks by pushing down on the outside four corners.

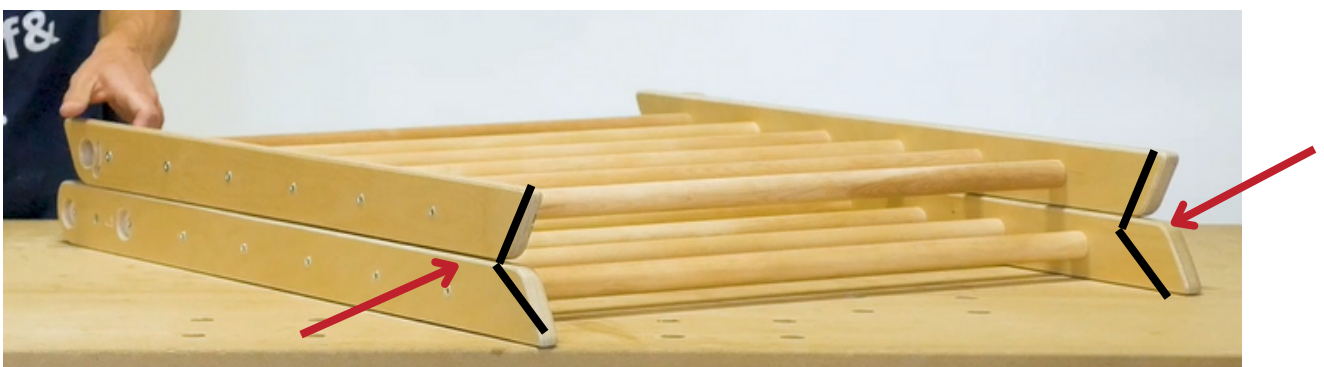

If the triangle rocks, push down on the lifted side while pulling up the opposing side until the leg assembly lays flat.

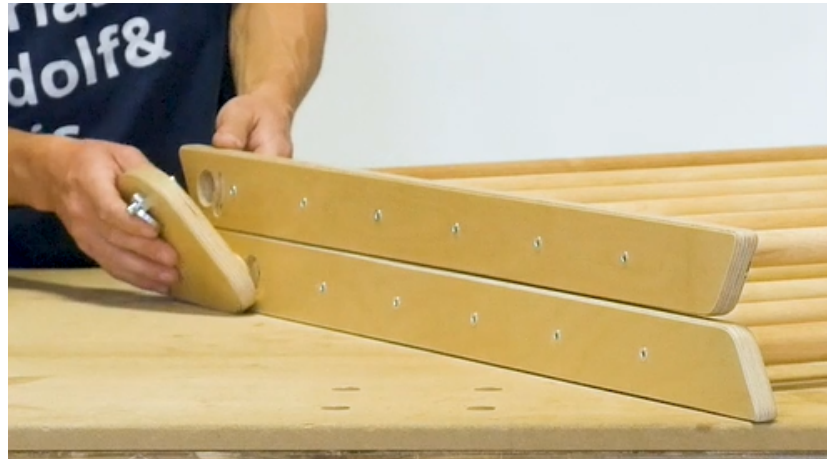

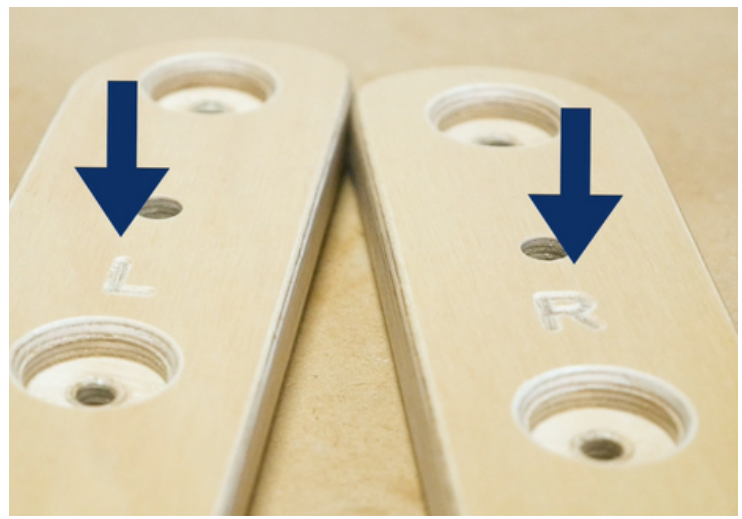

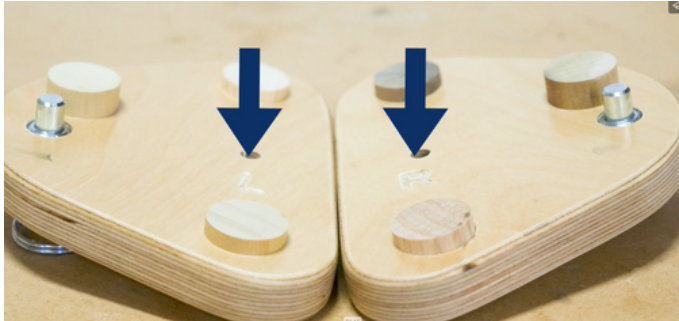

Repeat all steps with the short legs and remaining dowels

Place the short leg assembly on top of the long leg assembly. Notice the open "V" orientation between the 2 assemblies

With the connector plates, match up the engraved L's and R's by pushing the 1" pegs in the plates into the 1" holes in the leg assemblies

Use the 1-1/4" bolts and washers to secure the connector plates to the leg assemblies

Your triangle is complete!
