BRIDGE-LOCK

SIDE MOUNT

PICATINNY

Scan for more information about UV Slider™.

DUALDIAL™

Driven by a concentric dial architecture with zero backlash and optimized gear ratio, UV Slider™ touts effortless adjustments with a single turn of the dial.

TRIPLEMARK™

A unified pin and indicator pairing solution that makes every pin a floating pin – guaranteeing precision at any distance. The indicator pins are ultra-fine and close to the tape for increased precision.

UV3XL™ SE

UV3XL™ Slider Edition offers superior functionalities and enhanced ease of use with an integrated, removable light cartridge for consistent pin brightness.

QUICKBREAK™

allows for quick breakdown of the sight and scope unit from the vertical rail, making traveling and cleaning easy for when distant hunts get dirty.

UV BUTTON™

UV Button™ is equipped with our new ULTRAGLIDE™ bushing technology resulting in an incredibly low maintenance, smooth, and reliable release. Designed to perfectly fit your hand - UV Button™ makes every shot comfortable and consistent.

With a wide range of travel and force adjustment, spring-actuated d-loop retainment, wrist strap slot, ergonomic contoured knob, rubber bumper silencing system and highly durable finish - nothing was spared and no detail overlooked on UV Button™.

UV Button™ also shares the same profile as The Hinge 2, making the switch between both releases seamless.

2 and 4 finger attachments sold separately.

ADJUSTABILITY

Micro-adjust wide ranges of force and travel. The force can be set feather-light or super-heavy without needing to swap springs.

STRING RETAINER

Allows you to keep UV Button™ on your string without it falling off, ensuring you're ready at all times - a must have for all hunters.

LANYARD SLOT

Inspired by the Hunting Bracket, the third finger has a lanyard slot for archers who prefer using a wrist lanyard.

DURABLE FINISH

Unmatched durable Smoke Gray and Matte Black finish options available.

CONTOUR KNOB

The Contour thumb knob has an ergonomic dished contour with non-slip spiral grooves - ensuring it fits your thumb while creating a tactile repeatable point of reference.

THE HINGE 2

With The Hinge 2, we started the design by first looking at the human hand. Your release hand is one of two sources of input to your bow -- making your release one of the most important equipment decisions you can make.

We measured hundreds of hands and researched how they work -- all the way down to the bone and muscle structure. The Hinge 2 release is truly one of the most comfortable releases you'll ever shoot; designed to fit your hand perfectly every time you draw your bow.

This consistent hand placement helps you develop rock-solid shot execution and tighter groups. Never let your release hang up again and improve your shot with The Hinge 2.

2 and 4 finger attachments sold separately.

MICRO-ADJUST CLICK & FIRE

A dual moon system allows you to micro-adjust the timing of both your click and fire moons.

DEADLY QUIET MAGNETIC HEAD RETENTION

Making it whisper quiet in the woods and always at the ready.

ACCESSORIES

Can be fitted with 2 and 4 finger attachments to customize your grip.

DESIGNED FOR COMFORT AND CONSISTENCY

The Hinge 2 has deliberate, ergonomic finger beds that fit your hand perfectly.

BEERREAL MATHEWS GRIP 2.0

We've engineered the BEERREAL 2.0 with a flat grip face, a deep rounded throat, and an overmolded rubber panel – all designed to enhance accuracy and moderate input – without sacrificing comfort.

The BEERREAL 2.0 grip body is molded from high-quality ceramic polymer composite so that the cold is never an issue.

ARROW SHELF

Designed to help protect your fingers when in close proximity to arrows, as well as secure your arrows in place.

FLAT GRIP FACE

Designed with a flat grip face that contours into a deeply rounded grip throat that comfortably optimizes accuracy and consistency.

RUBBER OVERMOLDING

Specifically designed to provide excellent grip in adverse weather conditions, while retaining rigidity for consistency from shot to shot.

ENGINEERED POLYMER GRIP

Ceramic polymer grip body has excellent - thermal properties to stay warm to the touch, even in cold weather.

UV3XL™ SE

An acclaimed scope system optimized for UV Slider™.

The UV3XL™ Slider Edition enhances precision for bowhunters prioritizing field time. It pairs seamlessly with the UV Slider™ sight, featuring the UV Cartridge system for easy pin adjustments without losing sight marks.

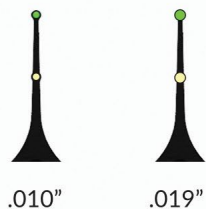

The integrated light cartridge ensures consistent pin brightness in all conditions. Recognized for superior performance, this award-winning scope system redefines its category, enhancing your field effectiveness with unparalleled performance.

UV3XL™ SE also fits most major archery sights. See compatibility chart at the QR code below.

UV STABILIZER™

Precision and Power - Perfectly Balanced

UV Stabilizer™ is a high-performance stabilizer that delivers precision in every shot and power in every ounce.

On average, UV Stabilizer™ is 13% stiffer than bars with similar diameters. Its patent-pending UV QuickWeight™ system allows for quick and easy weight changes, making it a versatile choice for target archers of all styles.

UV Stabilizer™ is the ultimate choice for anyone looking to take their archery game to the next level. Proudly designed and built in America.

STIFFNESS

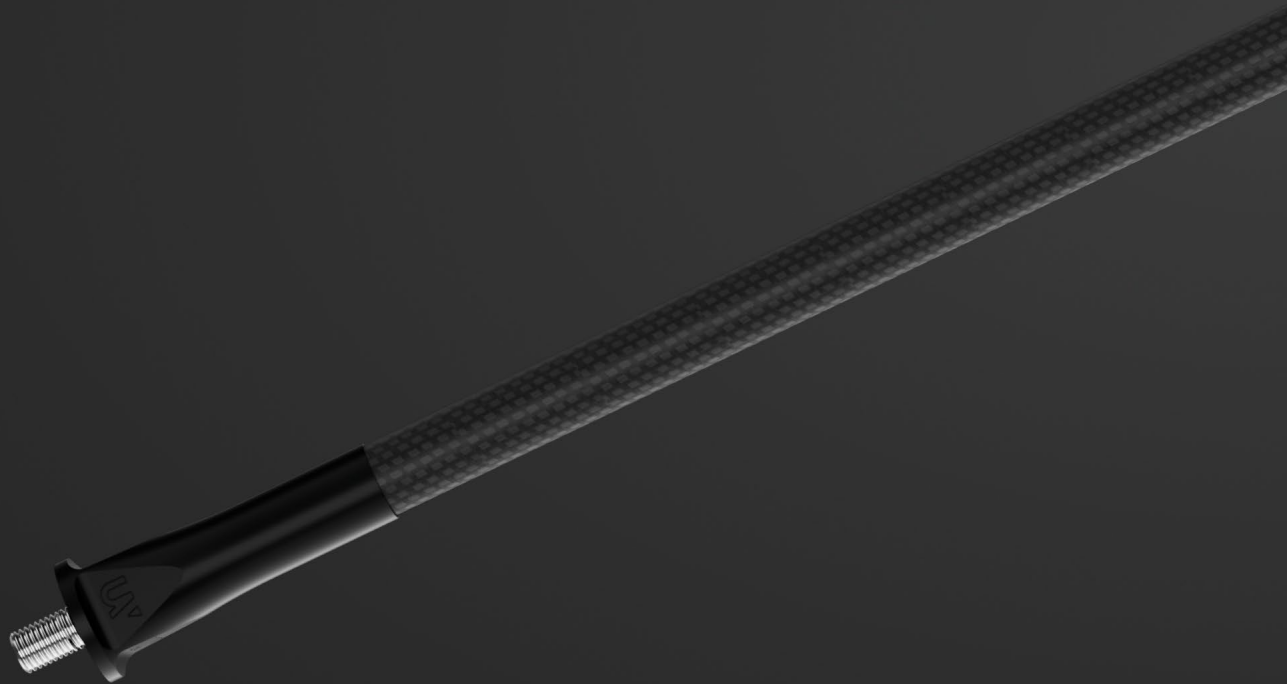

UV Stabilizer™ is 13% stiffer than the competitive average stiffness using the internal single fixed point testing method.

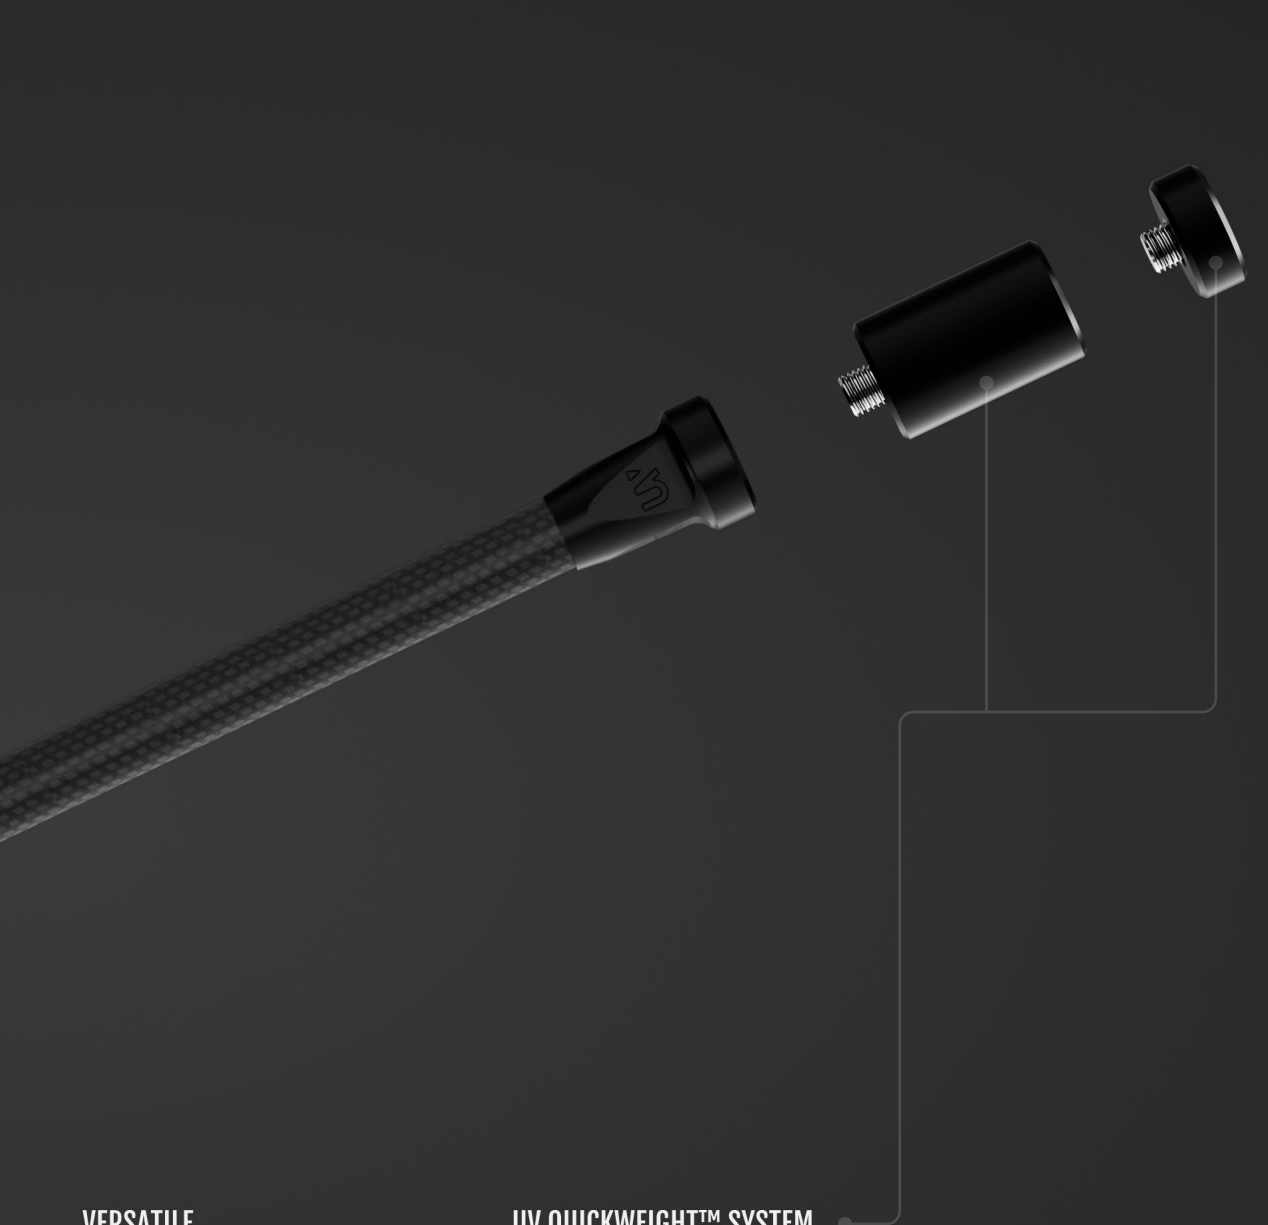

LIGHTNESS

UV Stabilizer™ is designed to be one of the lightest stabilizers on the market. The 30" bar-only weighs in at 5.17oz while the 15" bar- only weighs in at 3.25oz.

THIN DIAMETER

At .5", UV Stabilizer™ is extremely thin, allowing it to cut through the air with minimal drag, giving you a more stable and precise hold, even in harsh winds.

VERSATILE

The UV Stabilizer™ is compatible with a wide range of bows and archery styles, making it a versatile choice for any target archer looking to take their game to the next level.

UV QUICKWEIGHT™ SYSTEM

The patent-pending UV QuickWeight™ system allows for quick and easy weight changes without extra hardware and is coated in supremely durable PVD coating.

UV QUICKWEIGHT™

UV QuickWeight™ is an innovative, patent-pending stabilizer weight solution that streamlines weight changes without requiring extra hardware like set-screws or lengthy threaded rods.

Made from premium-grade stainless steel and coated with an ultra-durable PVD process, these weights have a flawless black finish.

With UV QuickWeight™, adjusting your stabilizer setup is effortless, convenient, and enjoyable. Experience the ultimate weight upgrade with UV QuickWeight™.

UV SIDE MOUNT™

UV Side Mount™ is a rear-mounting side mount designed for use with UV Stabilizers. Machined from top-quality aluminum, this mount provides an uncompromising stability that withstands the test of time.

Its wide range of adjustability allows for effortless customization, while the integrated T-slotted quick-disconnect feature simplifies the installation of the rear stabilizer.

In addition, UV Side Mount™ is expertly anodized to perfectly match UV Stabilizer™, delivering a seamless and cohesive look.

UV Side Mount™ is threaded with 5/16"x24 threads for compatibility with nearly all archery stabilizers.

UV DOUBLET™ LENS

UV Doublet™ is the best-performing and highest-quality lens for 3D and Target Archery.

Single lenses deform light to magnify targets, a second lens – bonded in perfect lenticular plane to the first – balances light distribution and wavelengths to perfectly replicate the target down range.

You won't get color fringing (aberrations) or focus differences as you get farther from the optical center – UV Doublet™ is sharp edge to edge allowing you to shoot your absolute best.
