## **NZX Release**

24 April 2018

### **Blis Technologies launch new flavour variant of popular HoneyBlis®**

Blis Technologies have launched a new flavour variant of their HoneyBlis® product, a honey-based throat lozenge that combines the benefits of kamahi and manuka honey with oral probiotic BLIS K12®.

Designed to soothe and protect the throat, HoneyBlis® with Ginger Extract was developed to complement the successful HoneyBlis® product. HoneyBlis® with Ginger Extract adds to the portfolio of throat products containing patented probiotic BLIS K12®.

“We wanted to add some diversity to the range of flavours on the market. Ginger is a well known botanical which works well with honey. The benefits of honey and ginger with BLIS K12® makes this a great product for the winter season” said Brian Watson, CEO.

HoneyBlis® with Ginger Extract is available in pharmacy and at the BLIS website [www.blis.co.nz](http://www.blis.co.nz).

A handwritten signature in black ink, appearing to be "Brian Watson", with a long horizontal line extending to the right.
