

NZX Release

1 February 2019

Blis Technologies Limited - Update of the company performance.

Third Quarter FY19, ending 31 December 2018

Blis Technologies Limited announces the interim results (unaudited) for the 3rd quarter ending 31 December 2018.

Revenue for the quarter was \$1.65m, with a positive EBITDA of \$0.11m. Revenue for the quarter was up 5% compared with the same period last year.

In the quarter we received sizable orders that were not able to be filled in time to avoid being impacted by Christmas freight delays so these have been carried over into January and will contribute to a strong final quarter.

YTD revenue of \$4.7m is 29% up on the same period last year. Based on known and expected orders for the final quarter including the first supply for an expanded Australia launch and ongoing supply in line with the northern hemisphere winter, we reaffirm our existing market guidance.

Full financial year (FY19) Guidance - Revenue in excess of \$7.0m, an EBITDA in excess of \$0.6m and a small net surplus before tax.
