**Step 1**

Take a piece of screw #7 and washer #9

Stick out the screw and washer through the hole on the right side of the backrest #4, (the armrests & backrest should be put up-side-down, so that you could put your hand inside the empty room of the backrest).

And connect the right armrest #2 with backrest#4 carefully.

In the same way, thread left armrest#3 with backrest #4.

Use the allen key for secure the positions, after the screw is connected by hand to the thread on the armrest.

THIS IS VERY IMPORTANT!!

Backrest#4 MUST be connected to armrests (#2&#3) using #7 screw IN STEP 1, as the space inside the backrest is very small and if not following our instruction, it would be very hard to join the two parts afterwards.

**Step 2**

Use 2pcs of Screw #7 to fasten the bottom of backrest #4 and 2 armrests (#2&#3).

**Step 3**

Take the seat and put it up-side-down the same way.

Connect the seat with the bottom of the armrests and back rest with 8 pcs of screw #7.

Starting from the back of the seat, then get the sides of the seat connected to the armrests, and lastly the sides of the front part of the seat connected to the armrests.
