

Measuring and Ordering Casement Sash Components Only "No Glass"

Note: Casement replacement sashes are available with glass. Please see **Wood and Clad Casement Sash With Glass**

What you will need:

Tape measure

Paper and writing instrument
OR print out this sheet

1. First. Determine the type of casement window you are replacing.

Wood

Clad w/ Miter Joint

NOTE: If the corner is a miter joint please call for availability. A sash with a miter joint **CANNOT** be ordered online.

Clad w/ Butt Joint

2. Second. Measuring the window.

Measure the daylight opening of the window, this is the opening that would be cleaned when cleaning the glass.

Do not measure the outside of the window, only the opening that receives daylight. This area is highlighted green in the illustration.

Daylight opening shown in green

A= Width
B= Height

3. Third. Provide us the info!*
