SAFETY NOTES 安全注意事项

Remote control model airplanes and helicopters are high-risk commodities, and they must be kept away from crowds when flying. Improper assembly or damaged parts, poor electronic control equipment, and unfamiliar handling may lead to unforeseen accidents such as loss of control and damage to the flight. Please pay attention to flight safety and understand the responsibility for any accident caused by your own negligence.

遥控模型飞机、直升机属于高危险性商品，飞行时务必远离人群，人为组装不当或机件损坏，电子控制设备不良，以及操控上的不熟悉、都有可能导致飞行失控损伤等不可预期的意外，请飞行者务必注意飞行安全，并需了解自负疏忽所造成的任何意外之责任。

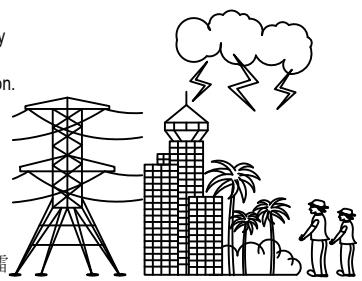

LOCATE AN APPROPRIATE LOCATION 远离障碍物及人群

Helicopter flying has a certain speed, which is relatively potentially dangerous. The choice of venue is also relatively important. Please abide by local laws and regulations and go to a legal remote control flight venue to fly. You must pay attention to whether there are people, high-rises, buildings, high-voltage wires, trees, etc. around, so as to avoid damage to your own or other people's property caused by improper manipulation. When practicing for the first time, be sure to choose to fly in an open, legal and exclusive flight site and properly match the training rack, which will greatly reduce the damage caused by flight errors. Do not operate in bad weather such as rainy days and thunderstorms to ensure the safety of yourself and the body.

直升机飞行时具有一定的速度，相对的也潜在着危险性，场地的选择也相对的重要，请遵守当地的法律法规到合法的遥控飞行场地去飞行。

必须注意周边有没有人、高楼、建筑物、高压电线、树木等等，避免操控的不当造成自己与他人的财产损坏。

初次练习时，务必选择在空旷合法专属飞行场地并适当搭配练习架飞行，这对于飞行失误所造成的损伤将会大幅的降低。请勿在下雨天、打雷等恶劣天气下操作，以确保本身及机体的安全。

PREVENT MOISTURE 远离潮湿环境

The interior of the helicopter is also composed of precise electronic parts, so it must be absolutely protected from damp or moisture. Avoid using it in the bathroom or in rainy days, to prevent moisture from entering the interior of the fuselage and causing the failure of the parts and electronic parts, resulting in unexpected accidents!

直升机内部也是由精密的电子零件组成，所以必须绝对的防止潮湿或水气，避免在浴室或雨天时使用，防止水气进入机身内部而导致机件及电子零件故障而引发不可预期的意外！

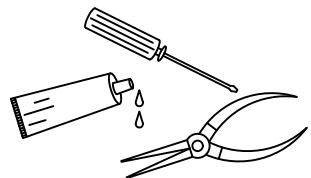

PREVENT OPERATION 勿不当使用本产品

Do not modify and process by yourself. For any upgrade, modification or repair, please use the parts in the product catalog of GOOSKY to ensure the safety of the structure.

Please confirm to operate within the product limits, do not use overload, and do not use it for other illegal purposes other than safety and laws.

请勿自行改造加工，任何的升级改装或维修，请使用谷天科技产品目录中的零件，以确保结构的安全。

请确认于产品限界内操作，请勿过载使用，并勿用于安全、法令外其他非法用途。

OBTAIN THE ASSISTANCE OF AN EXPERIENCED PILOT 避免独自操控

Before arriving at the flight site, it is necessary to confirm whether there are friends of the same frequency flying, because turning on the transmitter of the same frequency will cause unexpected dangers such as immediate interference with others.

Remote control aircraft control skills are difficult in the early stage of learning. It is necessary to avoid operating the flight alone as much as possible, and it needs the guidance of an experienced person to control the flight. Diligent practice of computer simulators and veteran guidance is a necessary choice for entry

至飞行场地前，需确认是否有相同频率的同好正在飞行，因为开启相同的频率的发射机将导致自己与他人立即干扰等意外危险。

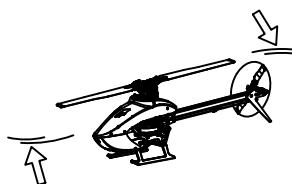

遥控飞机操控技巧在学习初期有着一定的难度，要尽量避免独自操作飞行，需有经验的人士在旁指导，才可以操控飞行。（勤练电脑模拟器及老手指导是入门必要的选择）

SAFE OPERATION 安全操作

Please operate this helicopter within your own capabilities and within a certain technical range. If you are too tired, mentally or improperly operated, the risk of accidents may increase.

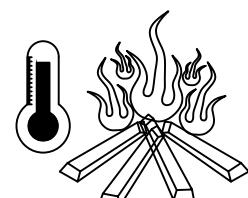

请于自己能力内及需要一定技术范围内操作这台直升机，过于疲劳，精神不佳或不当操作，意外发生风险将可能会提高。

ALWAYS BE AWARE OF THE ROTATING BLADES 远离运转中的零件

When the main rotor and tail rotor of the helicopter are running, do not touch and keep away from any objects to avoid danger and damage

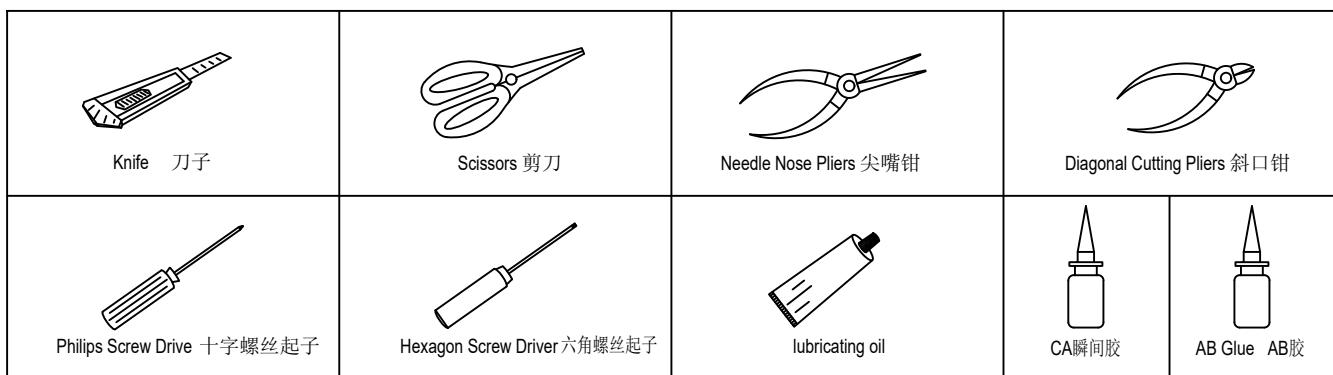

当直升机主旋翼与尾旋翼运转时，切勿触摸并远离任何物件，以避免造成危险及损坏。

KEEP AWAY FROM HEAT 远离热源

Most of the remote control planes are made of fiber, polyethylene, and electronic products. Therefore, try to stay away from heat sources and sunlight to avoid the possibility of deformation or even meltdown and damage due to high temperature.

遥控飞机多半是以PA纤维或聚乙烯、电子产品为主要材质，因此要尽量远离热源、日照、以避免因高温而变形甚至熔毁损坏的可能。

**Notice:**

1: Each group of main propellers has been selected, weighed and matched before leaving the factory. When there are multiple pairs of main propellers at the same time, multiple groups cannot be mixed and used. If the main propellers are mixed and used, it will cause the helicopter to fly unstable and abnormally vibrate, and may lose control in severe cases.

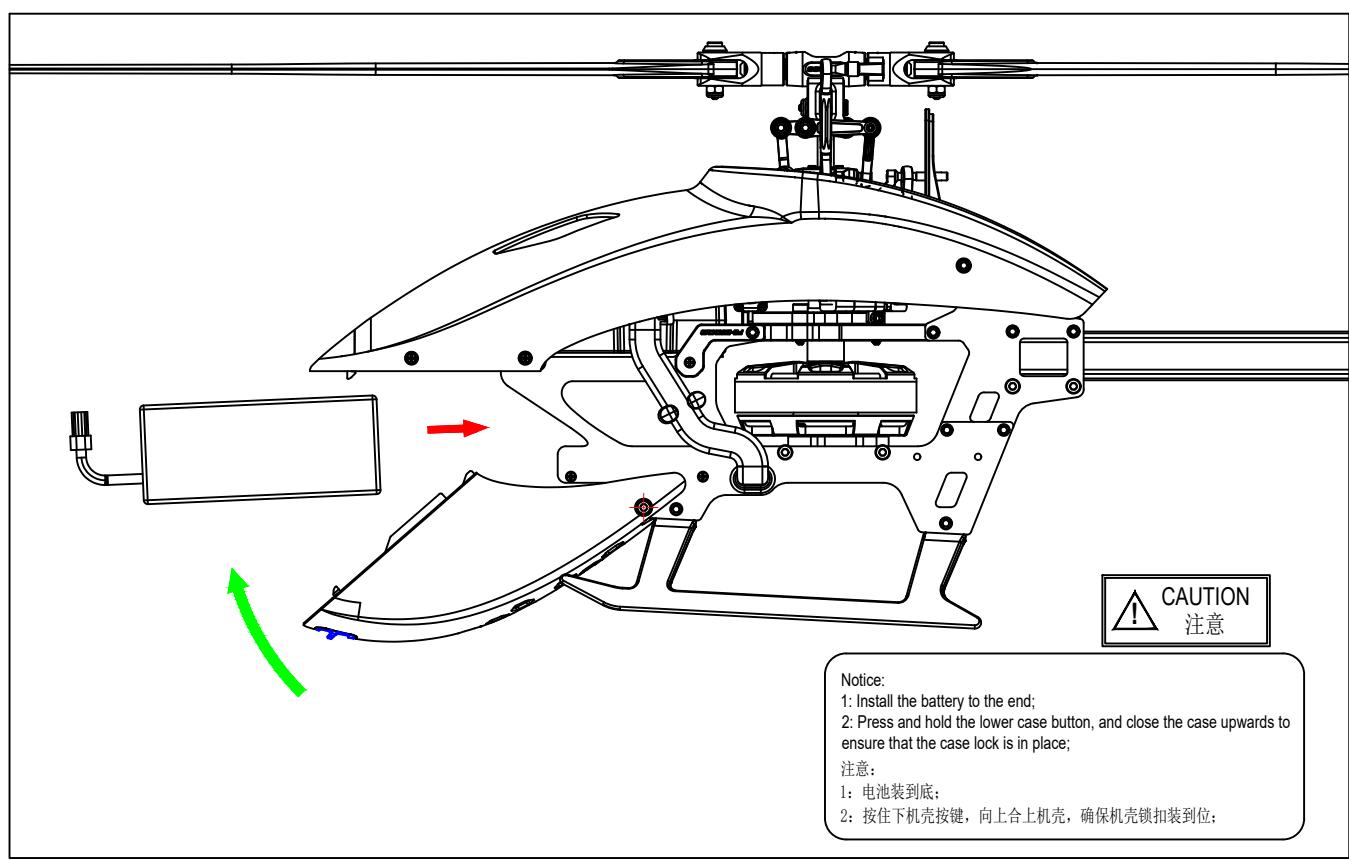

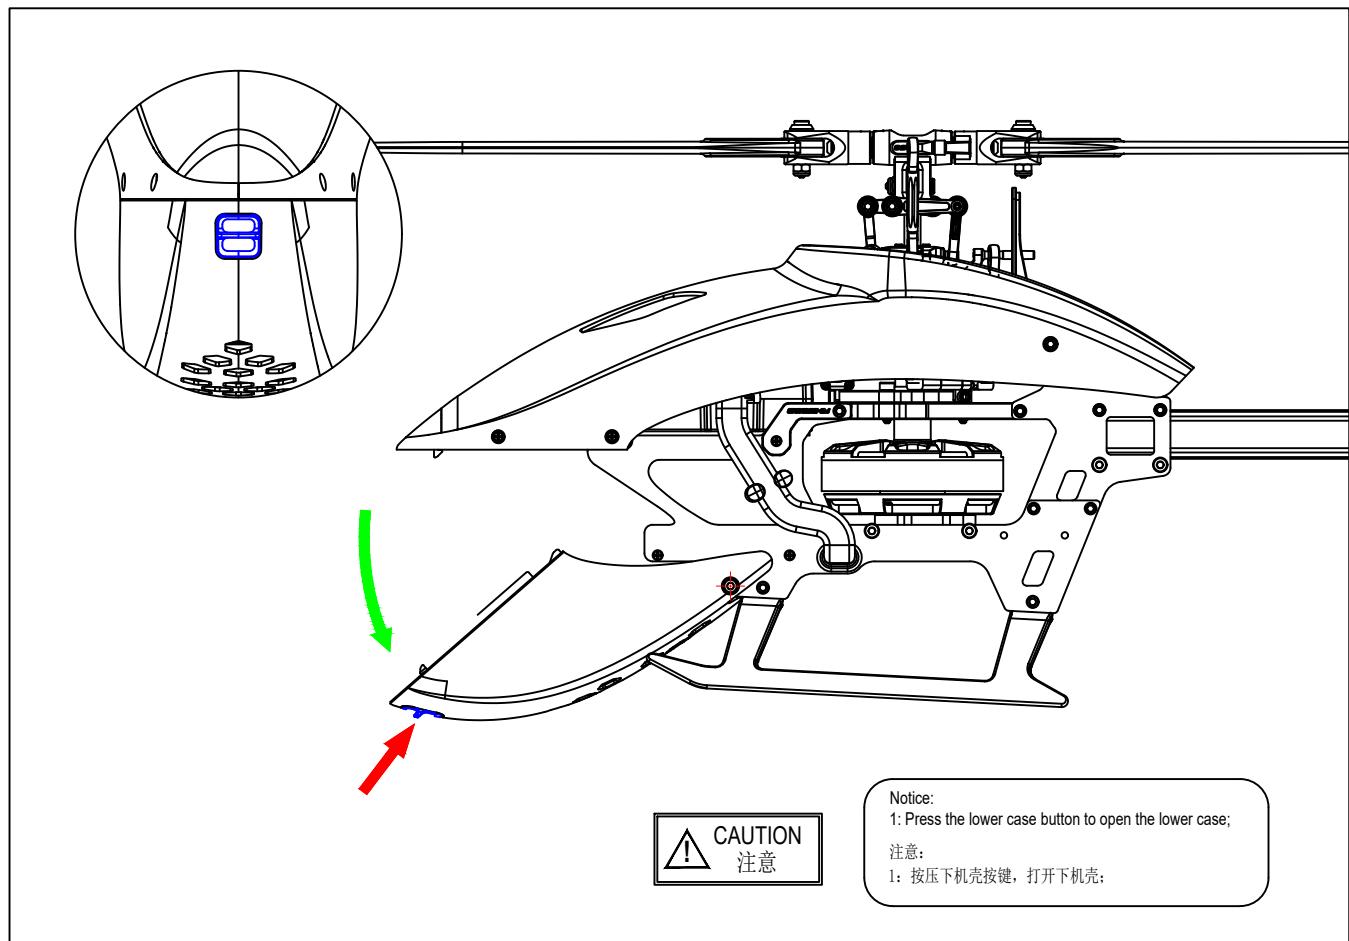

2: When assembling the tail rotor, the fixing screw must not be locked too tightly. After locking, the tail rotor needs to be folded by hand. It is better to have a slight damping feeling. The tightness of the two tail rotors should be the same. Inconsistent or too tight tightness will cause the body to vibrate and cause instability during flight, and may lead to loss of control in severe cases. Please be careful, and develop pre-flight inspections and regular maintenance.

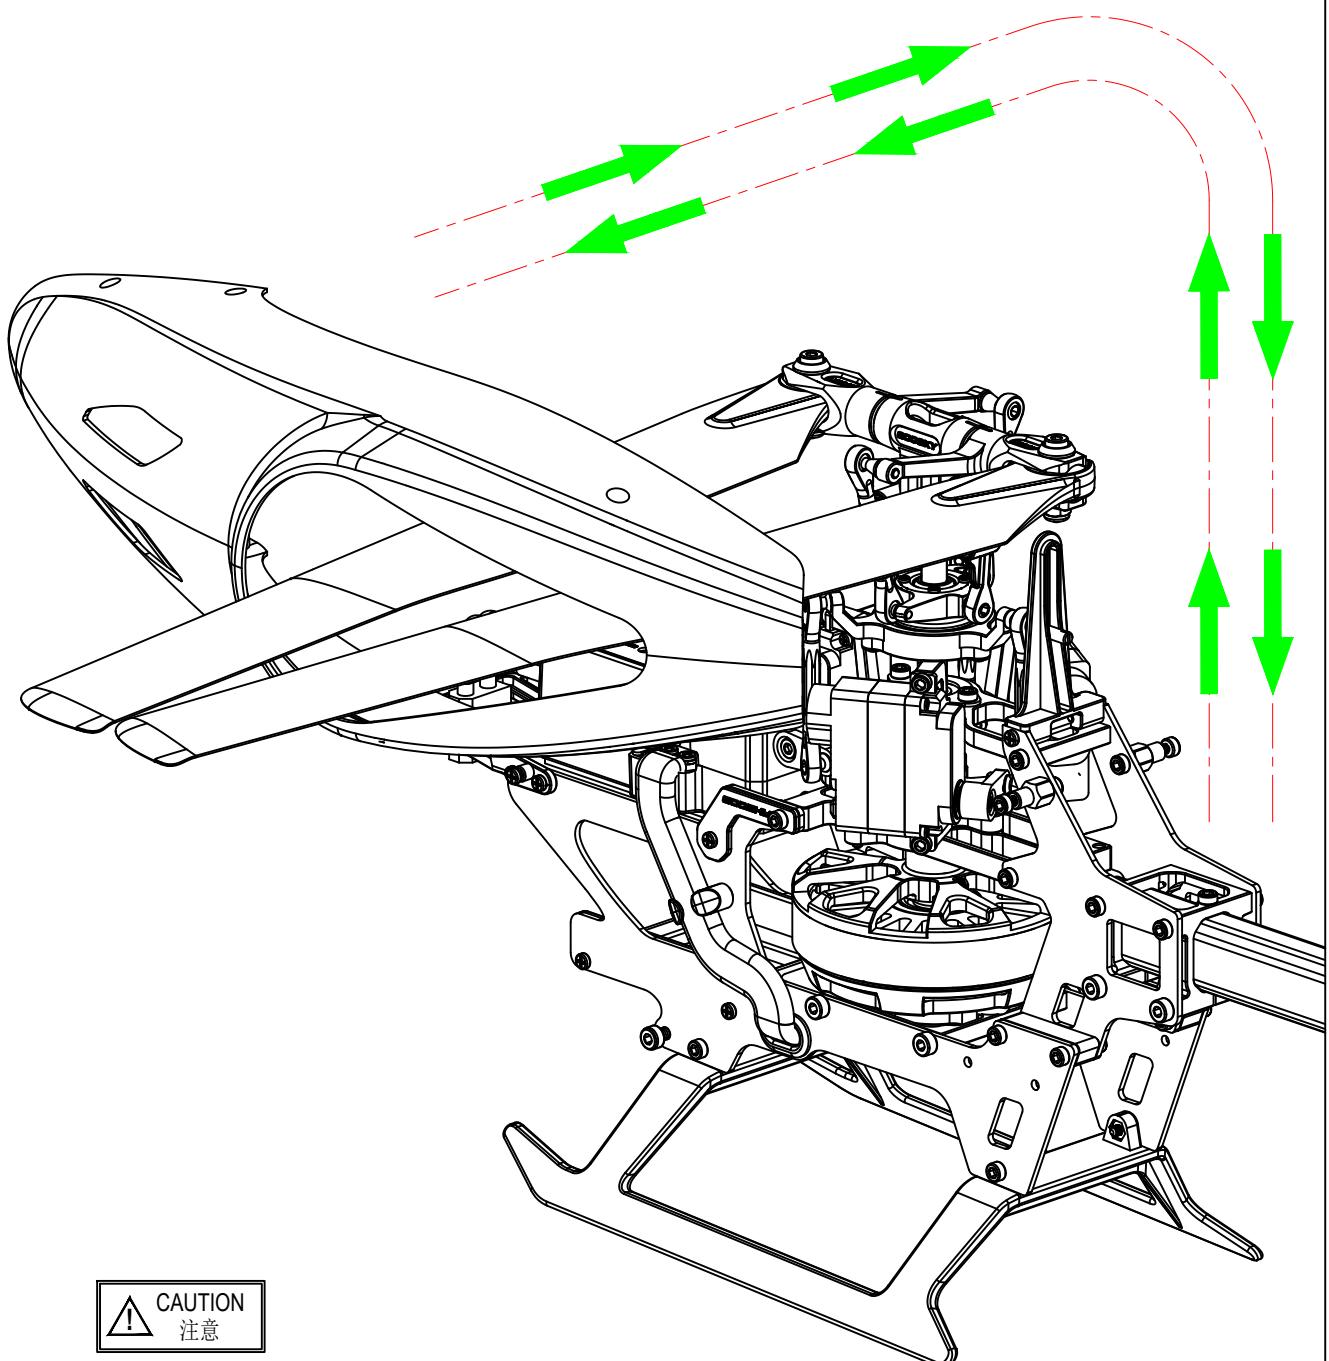

注意:

1: 每组主桨组,出厂时已完成选号、称重配对,当同时有多对主桨时,不可多组混搭使用。主桨组若混搭使用,会造成直升机飞行不稳定异常震动,严重的可能会失控。

2: 主装配时固定螺丝绝对不能锁太紧,锁紧后需用手折动主桨,要有轻微的阻尼感为佳,两支主桨的紧度要一致。紧度不一致或者过紧会造成机体震动导致飞行时不稳定,严重的可能会导致失控,请务必小心注意,并养成飞行前检查并定期保养。

	Socket screw 圆柱头内六角机械螺丝 (M2X12 半牙) x2
	M2 screw sleeve M2螺丝套 x2
	Flat bearing gasket 平面垫片 (Φ2*Φ10*0.2mm) x4
	M2 Nut M2尼龙防松螺母 x2

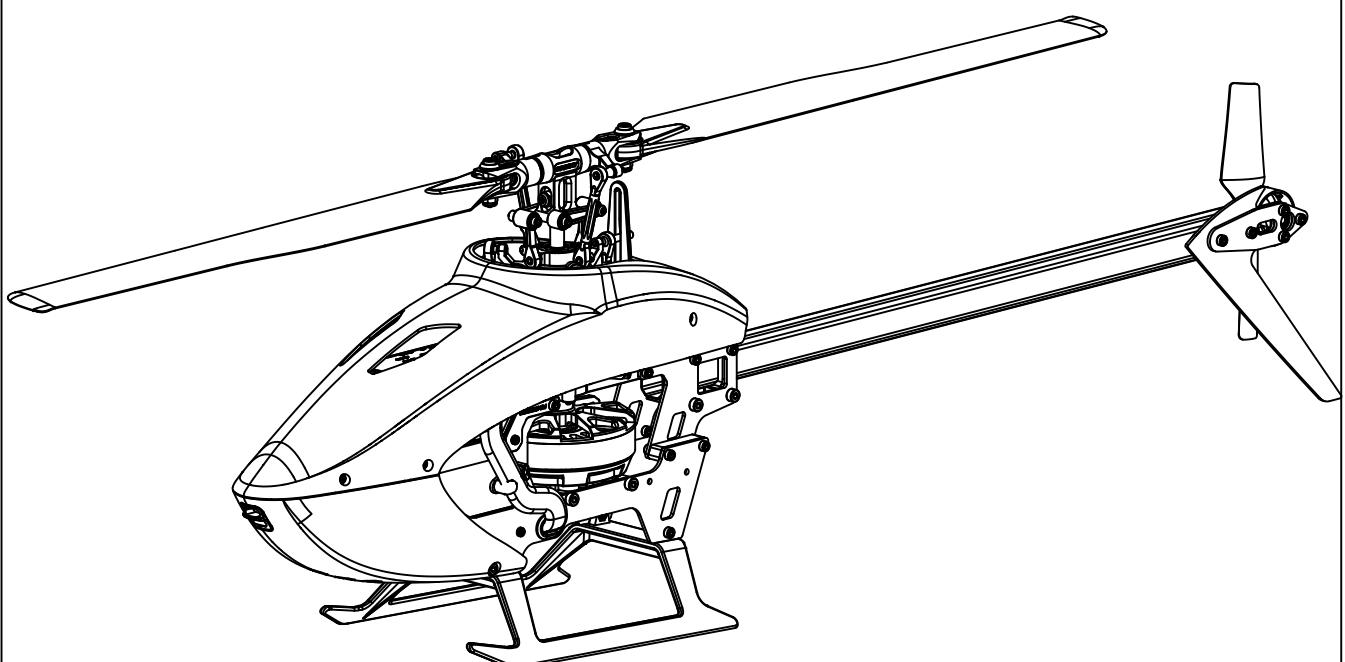

CAUTION
注意

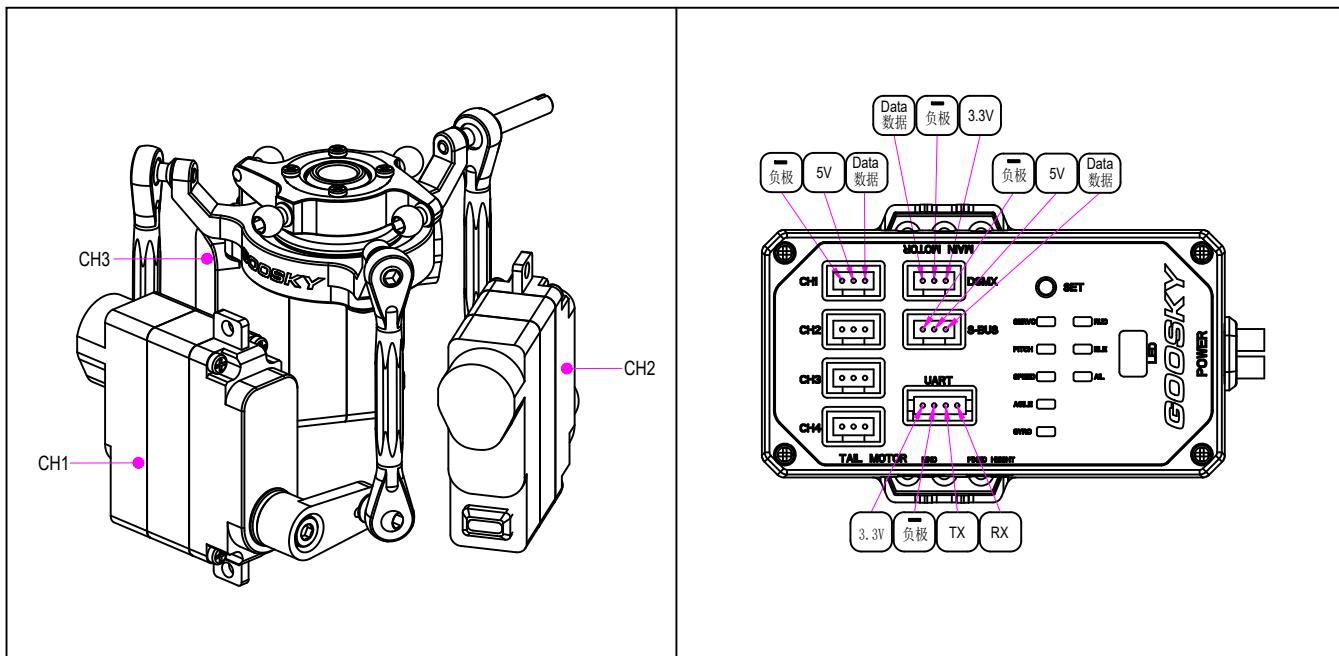

How to disassemble the upper case:

- 1: Disassemble the fixing screws on both sides.
- 2: The propeller is turned to the side of the fuselage, and the two blades are retracted.
- 3: Move the upper casing upwards and turn it 90 degrees toward the blade position, and it can be disassembled;

上机壳拆解方法：

- 1: 拆解两侧的固定螺丝。
- 2: 螺旋桨转到机身侧面，两支桨叶收起来。
- 3: 上机壳向上移动，朝着桨叶位置转90度，就可以拆解下来了；
