PROTON® PRODUCTS OVERVIEW

Proton Data Security is the world's leading manufacturer of degaussers and data erasure products. With over 30 years of experience in the data security industry, our line of quality degaussers and destroyers ensures that sensitive data is erased in accordance with recognized standards and is completely unrecoverable. All of our products are proudly manufactured in the USA and meet or exceed U.S. National Security Agency (NSA) and Department of Defense (DoD) requirements for sanitizing electronic media. Several Proton products are approved for erasure of Top Secret / Classified data and use patented technology, which sets us apart from the competition. Our understanding of the constantly changing data security industry allows us to provide customers with the latest technology for permanently erasing data.
