

30" DuraTrim

High Speed Laminate Sheeter and Trimmer

The 30" DuraTrim provides high accuracy sheet separation for production laminating systems. Its fiber-optic eye reads sheet edges and activates the flying knife to cut with unmatched accuracy. Using a flying knife separation process gives this unit the ability to process a wide variety of films. The 30" DuraTrim features a heavy-duty motor for increased speed and an operator-friendly control panel.

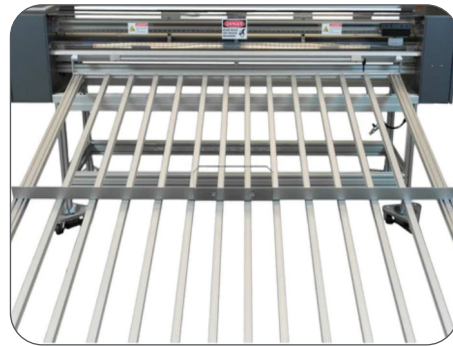

KEY FEATURES

- High accuracy sheet separation
- Operator-friendly touch screen
- Variable speed center rack dancer system
- HD ball bearing pneumatic rail rod-less cylinder
- Made in USA
- One-year warranty

Advanced Flying Knife Mechanism:

This high-speed flying knife offers cut accuracy to the 1000th of an inch to increase productivity.
