

Crimp@Coil

Electric Double-Sided Coil Crimper

This machine will be a time saver by speeding up your coil binding process. The Crimp@Coil is an easy to use system that cuts and crimps both sides of the coil at the same time, preventing it from rolling back out of the holes of your document. It has a simple 5-step setup process and only takes seconds to change the coil or sheet size settings. This unique design is the ideal choice for high-volume binding facilities, as well as anyone who wants to avoid manual crimping.

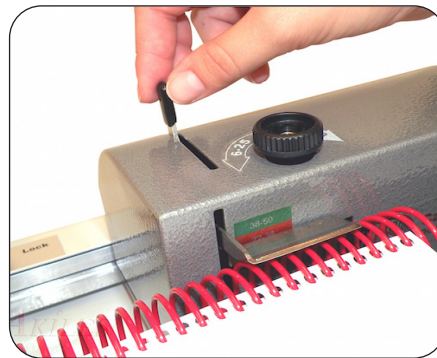

KEY FEATURES

- Adjustable knives and crimper heads
- Works on full range of coil sizes
- Simple 5-step setup process
- Coil alignment guides
- All metal construction
