

DURALAM PRO 550

High Speed Duplex Hot Roll Commercial Laminator

The DuraLam Pro Series two sided laminators are commercial grade machines designed for years of trouble free operation. They feature a superior Hot Roller design for scratch free production. The electrically heated rollers ensure fast warm up times, and utilize high quality heating elements that are maintenance free and provide a long life. Years of experience has guided the design of these laminators and every component is selected for its quality and durability.

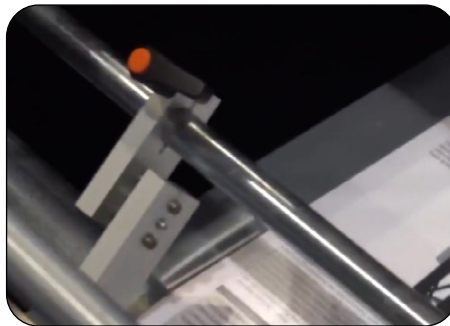

KEY FEATURES

- On the fly film alignment adjustment
- High precision blade holders
- Maintenance free bearings
- High powered cooling fans
- Two automatic trim options

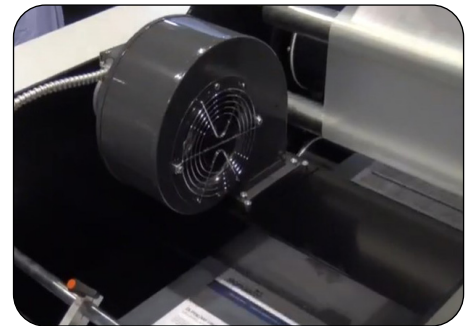

Innovative Technology:

On the fly film alignment adjustment ensures success for every project.

Adjustable blade holders

High powered cooling fans

Description	Specifications
Power Requirement	220 v
Laminating Speed	49 ft/min
Max. Laminating Thickness	15 mil
Max. Laminating Width	20"
Max. Output	2940 sheets/hr
