

# ILAM PRO

## PROFESSIONAL DIGITAL LAMINATOR

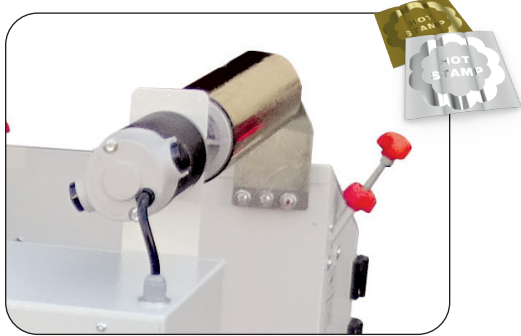

The ILAM PRO offers best-in-class laminating technology and unmatched consistency of the finished product. The use of oil heated rollers ensure the best distribution of heat and temperature retention across the whole surface. The machine is controlled by a touch screen that offers an Auto Start function, a fast loading system, multi safety monitoring program and automatic temperature regulation. This all ensures a rapid start up procedure and quick operation. We install a second heating engine to laminate the bottom side of the print. That means you can laminate both sides in one single pass.

### KEY FEATURES

- Touch screen
- Auto-start function
- Double heating engine
- Thermal oil sealed heating roller
- Extra blower on exit
- Multi safety monitoring program

### Digisleek HotStamp® module:

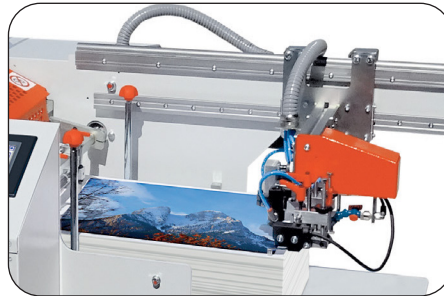

Multifunctional devise that allows metallic foiling, varnishing, and spot varnishing.

## OPTIONAL

Double side lamination module

Feeding module

Laminating modules

Description	Specifications
Dimension	83"L x 46"W x 63"H
Substrate Weight	90 # text / 130 # cover
Max. Laminating Speed	72 ft / min
Power Requirement	220 v
Power Consumption	50 - 60 Hz

Description	Specifications
Warm-Up Time	15 min
Air Compressor	Plant air
Heating System	Sealed auto-balance system
Pressure Control	Pneumatic cylinders
Film Core	3"
