

ProLam Plus 330

Dual Heat System Pouch Laminator

This pouch laminator is made up of a durable metal casing and gear construction accepting hot and cold laminates. This system can laminate up to 10 mil in thickness, carrier-free, reverse switch, and has variable temperature. The ProLam Plus 330 uses a heated roller system that allows for balanced heat distribution during the laminating process. This system guarantees crystal clear and bubble-free results.

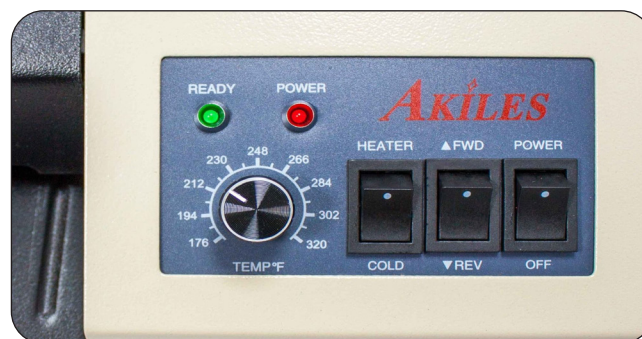

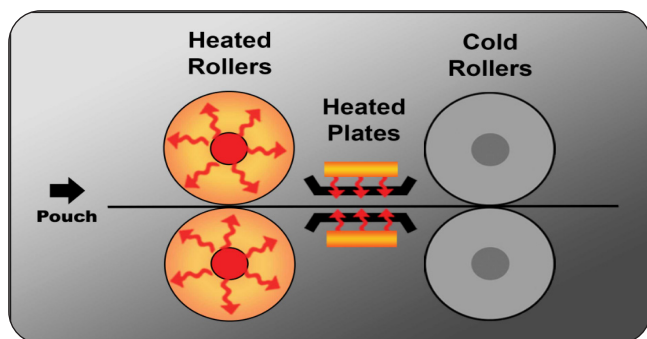

KEY FEATURES

- Power and ready lights
- Simple on and off power switch
- Forward and reverse switch
- Dual heat system
- Gradual temperature control
- One-year warranty

Dual Heat System:

Heated rollers and heat plate combination allows for a more efficient lamination at lower temperatures.
