

Magic Mirrors – EY05078

The mirrors are versatile and the children will use them in an open-ended manner. Here are some suggestions on how they may be used:

- These mirrors can be used in different formats on walls. Consider placing them at varying heights depending on the age of the children.
- Use as a table top or carpet activity. Children may enjoy using them standing up, vertically or horizontally.
- Use with an assortment of different materials. We tried jewels, beads, pebbles, fir cones etc. The children can arrange the items into patterns etc.
- Use as a base for a small world activity. Children enjoy making mini landscapes and the mirror can act as a base.
- Use in a sensory area with LED lights.
- The mirrors could be used in a role play area. When dressing up in different outfits it is important they can see what they look like.

They are also great for a role play hairdressing salon.
