

## Woodland Folk Houses

### **Product Code – EY06035**

This open-ended design lends itself to a variety of play scenarios. The children will create their own ideas, but here are few suggestions:

- Use them as houses for small world characters. Use with natural materials e.g. pebbles, pieces of wood and leaves. Incorporate elves and fairy figures.
- Use as shops. Make them part of a high street. The children could design the road. It could be made from paper or chalked directly onto the floor outside.
- Provide a range of resources for the children to design their own house contents. They could make the furniture, carpet, accessories etc.
- Use the houses to represent the houses of fairy-tale characters e.g. Goldilocks, Snow White etc. Use Blu Tack or masking tape to attached things. (This is easily removed, i.e. it's temporary).
- Some children will enjoy using the houses as garages for their vehicles. You could match the cars to the houses i.e. which is the largest, smallest etc.
