

## Super Shiny Metallic Sensory balls

### Product Code – EY06325

Children will love playing with these shiny spheres. Younger children can be on their tummies and crawl towards the ball, or have it gently rolled to them. When they can sit up gently pass the ball back and forth to them.

Place the balls on the carpet/rug area and let the children explore them. (We like to use them on the Silver Shimmer Rug).

Enable the children to incorporate other resources with the balls. We found that the children liked to place them in metal bowls and colanders and swish them around. Others liked to use them with scarves. They can cover them up and then reveal what is underneath.

The balls can be used as part of a shiny treasure collection. It other themes, e.g. silver theme, ball theme, round theme, etc.
