SAFETY DATA SHEET Unislick May 2022 Page 1 of 8

SAFETY DATA SHEET

SECTION 1: IDENTIFICATION OF THE MATERIAL AND SUPPLIER

□ **Product (material) name:** Unislick Water Based Tyreshine

□ Other names:

□ Recommended use:

□ **Supplier:** Sprint Cleaning Products 1/90 Heathcote Rd, Moorebank NSW 2170

□ **Tel:** 02 8712 2406 □ **Emergency:** Contact Poisons Info Centre 131 126 or Manufacturer

SECTION 2: HAZARDS IDENTIFICATION

□ Classification of the substance or mixture:

Hazardous according to the criteria of the Globally Harmonised System of Classification and Labelling of

Chemicals (GHS)

Hazard Categories: Flammable Liquids - Category 2

Serious Eye Damage/Irritation - Category 2A

□ Pictograms

□ Signal word: Danger□ Hazard statement(s):

H225: Highly flammable liquid and vapor. H319: Causes serious eye irritation

□ Precautionary statement(s):

Preventio	P233	Keep container tightly closed.		
	P240	Ground/bond container and receiving equipment.		
	P242	Use only non-sparking tools.		
	P243	Take precautionary measures against static discharge.		
	P210	Keep away from all sources of ignition. No smoking.		
	P264	Wash face, hands and any exposed skin thoroughly after		
	P280	Wear protective gloves/protective clothing/eye		
	P241	Use explosion-proof electrical/ventilating/lighting/equipment.		
Response	P303 + P361 + P353 P305 + P351 + P338	IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue		
	P337 + P313	If eye irritation persists: Get medical advice/attention.		
	P370 + P378	In case of fire: Alcohol resistant foam is the preferred fire- fighting medium. However, if it is not available, fine water spray or water fog can be used to extinguish.		
Storage	P403 + P235	Store in a well-ventilated place. Keep cool.		
Disposal	P501	Dispose of contents/container in accordance with local / regional / national / international regulations.		

SAFETY DATA SHEET Unislick May 2022 Page 2 of 8

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

MIXTURE:

Chemical name	CAS No.	% product	
Ethanol	64-17-5	<50%	
Other Non Hazardous		30%	
Water		Balance	

This is a commercial product and the exact ratio of ingredients may vary slightly and trace quantities of impurities are also possible.

SECTION 4: FIRST AID MEASURES

Swallowed Rinse mouth with water. Give water to drink provided victim is conscious. Do not

induce vomiting. If vomiting occurs, lean patient forward or place on left side (head-down position if possible) to maintain open airway and prevent aspiration.

Seek medical attention.

Eye Immediately flush eyes with plenty of water for at least 15 minutes while holding

eyelids open. Take care not to rinse contaminated water into the non-affected

eye. Seek immediate medical attention.

Skin Immediately remove all contaminated clothing, including footwear after wetting

with water if available. Wash affected areas thoroughly with water. If irritation

occurs, seek medical advice.

Inhaled Remove victim from exposure to fresh air. Allow patient to assume most

comfortable position and keep warm and at rest. If patient finds breathing difficult, and develops a bluish dis coloration of the skin, ensure airways are clear, and have qualified person give oxygen through a face mask. Seek immediate medical advice. BURNS: Immerse affected area in cold water for 10-15 minutes. Bandage lightly with sterile dressing. Treat for shock if required. Transport to hospital if

required.

Advice to Doctor Treat symptomatically based on individual reactions of patient and judgement of

doctor.

SECTION 5: FIRE FIGHTING MEASURES

General Measures Flame-proof equipment is necessary in all areas where this chemical is being

used. Nearby equipment must be earthed. Remain upwind and notify those

downwind of hazard.

Flammability Conditions Extinguishing Media

Highly flammable. Vapours may form explosive mixtures with air.

In case of fire, appropriate extinguishing media include water fog or foam. Keep containers cool with water spray. If safe to do so, remove containers from path

of fire. Earth containers when dispensing fluids.

Fire and Explosion Hazard Highly flammable- explosive vapour. May ignite from sources including

cigarettes, open flames, spark producing switches / tools, heaters, naked lights,

pilot lights, mobile phones etc

Hazardous Products of

Combustion

May evolve toxic gases (carbon oxides, hydrocarbons) when

heated to decomposition.

Special Fire Fighting

Instructions

Clear fire area of all non-emergency personnel. Stay upwind. Keep out of low areas. Eliminate ignition sources. Move fire exposed containers from fire area if

it can be done without risk. Do NOT allow fire fighting water to reach waterways,

drains or sewers. Store fire fighting water for treatment.

Personal Protective

Equipment

Fire fighters should wear a positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, trousers, boots and gloves) or chemical splash suit. Please note: Structural fire fighters' uniform will provide limited protection.

SAFETY DATA SHEET Unislick May 2022 Page 3 of 8

Flash Point 13 - 18 °C Closed Cup

Lower Explosion Limit 3.3 %
Upper Explosion Limit 19.0 %

Auto Ignition Temperature

No Data Available

Hazchem Code YE

SECTION 6: ACCIDENTAL RELEASE MEASURES

General Response Procedure Shut off all possible sources of ignition. Use clean, non-sparking

tools and equipment. Avoid accidents, clean up immediately.

Increase ventilation.

Clean Up Procedures Absorb spill with sand or similar, collect and place in sealable

containers for disposal according to local authority guidelines.

Containment Stop leak if safe to do so.

Environmental Precautionary Measures: Do NOT let product reach drains or waterways. If product does enter a waterway, advise the Environmental Protection Authority or your local Waste Management.

Evacuation Criteria: Evacuate all unnecessary personnel.

Personal Precautionary Measures: Personnel involved in the clean up should wear full protective clothing as

listed in section 8.

SECTION 7: HANDLING AND STORAGE

Handling

Ensure an eye bath and safety shower are available and ready for use. Observe good personal hygiene practices and recommended procedures. Wash thoroughly after handling. Take precautionary measures against static discharges by bonding and grounding equipment. Avoid contact with eyes, skin and clothing. Do not inhale product vapours. Avoid prolonged or repeated exposure. Operations should be carried out in an efficient fume hood or equivalent system. Remove contaminated clothing and wash before reuse. Discard contaminated shoes. Keep away from combustible material. Empty containers pose a fire risk, evaporate residue under a fume hood. Chemicals should be used only by those trained in handling potentially hazardous materials.

Storage

Store in a cool, dry, well-ventilated, fire-proof area. Keep containers tightly sealed when not in use. Inspect regularly for deficiencies such as damage or leaks. Protect against physical damage. Ground and bond storage containers. Store away from incompatible materials as listed in section 10. Store away from direct sunlight and other sources of heat. This product has a UN Classification of 1170 and a Dangerous Goods Class 3 (flammable) according to The Australian Code for the Transport of Dangerous Goods By Road and Rail

Container

Container type/packaging must comply with all applicable local legislation. Store in original packaging as approved by manufacturer.

SAFETY DATA SHEET Unislick May 2022 Page 4 of 8

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

General The following exposure standard has been established by The Australian Safety

and Compensation Council (ASCC); Ethyl Alcohol (ethanol) CAS: 64-17-5

TWA = 1000ppm (1880mg/m3)

Methyl isobutyl ketone CAS: 108-10-1 TWA = 50 ppm (205mg/m3)

STEL = 75 ppm (307mg/m3)

NOTE: The exposure value at the TWA is the average airborne

concentration of a particular substance when calculated over a normal 8

hour working day for a 5 day working week.

Exposure Limits No Data Available

Biological Limits No information available on biological limits for this product.

Engineering Measures A system of local and/or general exhaust is recommended to keep employee

exposures as low as possible. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. In poorly ventilated areas, mechanical explosion proof extraction ventilation is recommended. Flammable / explosive vapours may accumulate in poorly ventilated areas. Vapours are heavier than air and may travel some distance to an ignition source and flash back. Maintain vapour levels below the

recommended exposure standard.

Personal Protection Equipment RESPIRATOR: Where an inhalation risk exists, wear a type A

(Organic vapour) Respirator, At high levels wear Self Contained Breathing

apparatus (SCBA) or an Air-line respirator (AS1715/1716).

EYES: Wear splash proof goggles (AS1336/1337).

HANDS: Nitrile or neoprene gloves are recommended (AS2161).

CLOTHING: Flame-retardant coveralls and anti-static footwear (AS3765/2210).

RESPIRATORS: In general the use of respirators should be limited and engineering controls employed to avoid exposure. If respiratory equipment must be worn, ensure correct respirator selection and training is undertaken. Remember that some respirators may be extremely uncomfortable when used for long periods. The use of air powered or air supplied respirators should be considered where prolonged or repeated

use is necessary.

Work Hygienic Practices No Data Available

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Physical State Liquid

Appearance Liquid, Free of any foreign matter

Odour No Data Available

Colour Clear

pH No Data Available Vapour Pressure 5.9 kPa (@ 0 °C) Relative Vapour Density No Data Available

Boiling Point 78 °C

SECTION 10: STABILITY AND REACTIVITY

General Information Flammable liquid with explosive vapour.

Chemical Stability Product is stable under normal conditions of use, storage and temperature. **Conditions to Avoid** Avoid excessive heat, direct sunlight, static discharges, moisture and high

temperatures.

Materials to Avoid Oxidising agents (eg. Hypochlorites, peroxides), acids (sulphuric acid), strong

alkalis (eg. Hydroxides), heat and ignitions sources.

Hazardous Decomposition

Products

May evolve toxic gases (carbon oxides, hydrocarbons) when

heated to decomposition.

Hazardous Polymerisation No Data Available

SECTION 11: TOXICOLOGICAL INFORMATION

General Information

Low to moderate toxicity - irritant. This product has the potential to cause adverse health effects with chronic over exposure. Use safe work practices to avoid eye or shin contact and over exposure via inhalation.

Ethanol:

Inhalation LC50 Rat: 2000 ppm/10h Ingestion LD50 Mouse: 3450 mg/kg

Skin Irritant Skin irritant. Prolonged contact may result in drying and defatting of the SAFETY DATA SHEET Unislick May 2022 Page 6 of 8

skin, rash and dermatitis. Toxic effects may result from skin absorption.

Eye Irritant Irritating to eyes. Exposure may result in lacrimation, irritation, pain and

redness.

Ingestion Chronic ingestion may result in cirrhosis of the liver. Over exposure may

cause central nervous system depression. Low toxicity. Ingestion may result in gastrointestinal irritation, nausea, vomiting, abdominal pain, diarrhoea, headache, dizziness and drowsiness with large doses. Liver damage may

occur with high level of chronic ingestion.

Inhalation Inhalation may cause irritation to the respiratory system, nose and throat

irritation, coughing and headache. Over exposure may result in nausea,

dizziness and drowsiness.

SECTION 12: ECOLOGICAL INFORMATION

Ecotoxicity Golden ide LC0: >1000 mg/L/48h Daphnia Magna EC50: >1000 mg/L/24h

Mobility If spilled on solid, ethanol will either evaporate or leach into the ground due to

the relatively high vapour pressure and low absorption in soil.

No information available on bioaccumulation for this product.

Persistence/Degradability This product will biodegrade, probably to acetic acid and formaldehyde.

Ethanol will volatise from water and biodegrade, and is not expected to bioconcentrate. It will photodegrade in air with a half-life ranging from hours

(polluted air) to days (clean air).

Bioaccumulation Potential

Environmental Impact No data

SECTION 13: DISPOSAL CONSIDERATIONS

General Information Dispose of in accordance with all local, state and federal regulations. All empty

packaging should be disposed of in accordance with Local, State and Federal Regulations or recycled/reconditioned at an approved facility. For small amounts absorb with sand, vermiculite or similar and dispose of to an approved landfill site. Contact the manufacturer for additional information if larger amounts are involved.

larger amounts are involved

Precautions for landfill Contact a specialist disposal company or the local waste regulator for advice. This

material may be suitable for approved landfill.
